Personality Second Edition:

Handbook of Personality, Second Edition Lawrence A. Pervin, Oliver P. John, 1999 The revised second edition provides a historical overview of modern personality theory brings major theoretical perspectives into focus and reports on the current state of the science on a range of key domains [Handbook of Personality](#) Oliver P. John, Richard W. Robins, Lawrence A. Pervin, 2010-11-24 This authoritative handbook is the reference of choice for researchers and students of personality. Leading authorities describe the most important theoretical approaches in personality and review the state of the science in five broad content areas: biological bases, development, self and social processes, cognitive and motivational processes, and emotion, adjustment, and health. Within each area, chapters present innovative ideas, findings, research designs, and measurement approaches. Areas of integration and consensus are discussed, as are key questions and controversies still facing the field.

[The Construction of Personality](#) Sarah E. Hampson, 1988 This second edition substantially revised provides an introduction to current theory and research in the psychology of personality and examines this work from the perspective of constructivism **Personality. Second Edition, Etc** William G. Fern, 1932 **Psychology of Personality ... Second edition** Ross Stagner, 1948 *The Construction of Personality* Sarah E. Hampson, 2019-03-04 Originally published in 1988 this second edition of *The Construction of Personality* has been substantially revised and updated. The author provides an introduction to current theory and research in the psychology of personality at the time and examines this work from the perspective of constructivism. As a consequence of this constructivist approach, the book covers topics from social psychology, e.g. person perception, impression formation, as well as more conventional areas of personality. In this new edition, the constructivist perspective is emphasized by the addition of a new chapter in which the constructivist approach to personality is presented and the chapters on the lay and self perspectives have been extensively re-written. All the other chapters have been revised to include recent material.

Personality in Adulthood Paul T. Costa, Jr., Robert R. McCrae, 2013-10-18 Now in a revised and expanded second edition, this influential work argues for the enduring stability of personality across adult development. It also offers a highly accessible introduction to the five factor model of personality. Critically reviewing different theories of personality and adult development, the authors explain the logic behind the scientific assessment of personality, present a comprehensive model of trait structure, and examine patterns of trait stability and change after age 30, incorporating data from ongoing cross sectional and longitudinal studies. The second edition has been updated throughout with the authors' new findings, ideas, and interpretations, and includes a new chapter on cross cultural research. It culminates in an additional new chapter that presents a comprehensive theory of personality grounded in the five factor model.
