

# *Contemporary aesthetic perspectives on imagination and reality media*

Lorenzo Manera\*

## ABSTRACT

The growing and ubiquitous presence of ‘digital reality media’, meaning technological devices that do not rely either on inner visualization or imagination – such as Augmented and Virtual Reality devices and 360° video (Engberg & Bolter 2020) – raises several issues. Such issues are related to the role played by the imaginative faculties both within emerging visual-motor and perceptive configurations and within the transformative process of remediation instantiated by the virtualization of reality. This contribution aims firstly to discuss the concepts of second-order media and reality media (Bolter, Engberg & MacIntyre 2021) by linking them to Pinotti’s concept of an-iconology (Pinotti 2021). By drawing on Tavinor’s digital aesthetics (Tavinor 2022), this contribution argues that the an-iconic condition of VR media might be better intended as a desirable outcome in current research, rather than a condition already achieved.

In order to discuss whether the imaginative aspects and those that define the use of digital devices are characterized by an interactive statute, this contribution addresses Montani’s notion of ‘intermedial imagination’ (Montani 2022) and Flusser’s concept of *Technoimagination* (Flusser 2008). Thirdly, this paper discusses how the interactive concept of imagination – suggested by the re-definition of the relationship between distance and materiality, provenance and pertinence – is displayed differently in VR and AR. Finally, the contribution faces the topic of the fallout that the most recent technological development (in terms of reality media), such as BCI (brain computer interface), might have on human imaginative faculties.

## KEYWORDS

Reality media, Digital aesthetics, Intermedial imagination, Virtual reality, Augmented reality.

## *1. Second-order Media, Reality Media and Imagination*

Discussing the concept of ‘Reality media’, Engberg and Bolter recently defined it as a class of audiovisual technologies, including 360° video, Virtual and Augmented Reality, that “do not rely on imagination and inner visualization of worlds presented via text, but instead assert their physical presence in the world we inhabit”

## **Perspectives Of Reality Perspectives Of Reality:**

**Perceptions of Reality** Gregory Calise, 2003 Although we are all living in the same world we are simultaneously each living in our own separate universe where each person observes himself as the center of that universe Each person has a unique conditioning and belief structure that create his perspective in which he views reality The world then interfaces with each person to create a reality that conforms to his beliefs A person's conditioning and beliefs affect his attitudes and emotions which then magnetize certain energies that resonate to his state of being In this way each individual is creating a separate reality according to his perceptions of truth What we perceive as reality is only the surface of a much deeper and greater truth Beyond the apparent world lies the essence of life and a vast kingdom of hidden knowledge Our conditioning and beliefs bind us to a certain perspective in which we view our reality Perceptions of Reality show us how we can break free of the bondage of our conditioning that holds us in a life of mediocrity When we become free from this bondage we can change our perspective which in turn changes our perceptions From a higher perspective we can see the larger picture of our lives and the world We will see the circumstances that have created our present reality and the relationships of events and experiences that were previously beyond our horizons of perception From this higher perspective we will perceive the world in a new light It will change before our eyes and interface with us in a new and more positive way We will be able to take control of our lives change our destiny and shape a new future From this higher state of awareness we will discover the portal to access the abstract mind which is the mental function of genius and the doorway to revelation From the perspective of revelation we will open the doors into the absolute realms beyond material time and space and describes the perceptions of God the soul the world and the paths to higher consciousness Perceptions of Reality will show us how to access the abstract mind and open the doorways into revelation creating a new reality full of abundance harmony and joy The Reality of This World Charles P. Webel, 2025-10-29 The Reality of This World analyzes one of the most influential concepts known to humanity the world focusing primarily on the material conditions of our existence It is the companion to The World as Idea A Conceptual History Routledge 2021 Together the two volumes constitute The Fate of This World and the Future of Humanity In this book Charles P Webel examines the theories and policies that have constructed the world as it is He proposes strategies for transforming it into a more equitable and sustainable habitat both for humans and for the other species with whom we coexist on Earth In doing so he describes how the social and natural sciences as well as philosophy and the humanities have abetted our understanding of this world and explores why globalization and rationalization as well as such alternative realities as digital and AI technologies may simultaneously advance our collective well being while also putting life on Earth at existential risk In conclusion Webel proposes political and other solutions to mitigate such risks The Reality of This World will be of great interest to scholars in fields ranging from philosophy and intellectual history to political and social theory as well as to students and a general public interested in understanding and transforming our world
