Perspectives on Mobility Ingo Berensmeyer,Christoph Ehland,2013-08-01 Literature as cultural discourse has always courted mobility From the nomadic wanderings of the heroes of Homer and Virgil through the adventures of the medieval knight errants to the travellers of modern times movement and mobility have been constitutive elements of story telling Since writers have begun to explore the experiential dimension of movement their texts have embraced the essential changeability and instability of mobile worlds In this sense literature reflects and processes the transformative force of movement on the perception of the world and is part of the broader cultural discourses of mobility From the 1936 film Night Mail to the rapid movements of the dime novel detective and the metaphorical coding of automobility in Futurist poetry the essays in this volume offer new perspectives on the phenomenon of mobility at the intersection between the literary imagination and cultural experience They explore movement as a decisive force of change in the story of modernity and show how literature in its representation of mobility simultaneously aims both to mirror and to grasp the phenomenon
