**About PERT Testing** The PERT is a computer adaptive test established to determine whether a student is prepared for college level coursework. If a student does not meet the minimum required score set by the state it's an indication that the student needs more academic preparation. The high school is then required to provide postsecondary preparatory instruction. All students enrolled in public high school in the state of Florida are required to take the PERT in the eleventh grade. The PERT tests students' abilities in math, reading, and writing. The test directly tests for competence for intermediate algebra and freshman level composition. The PERT is not timed and each section has thirty questions. Scoring The PERT is not a test to pass or fail; it's used to determine the best academic path toward college for students. It's important for students to take the PERT seriously even though it isn't graded to ensure they are placed in the most appropriate classes. The PERT is scored by section in a range of 50-150 with cut scores throughout so students will get three different scores. There are three or four tiers depending on the section of cut scores to determine what level students are currently at.
