*The 21st Century in 100 Games* Aditya Deshbandhu, 2024-06-20 *The 21st Century in 100 Games* is an interactive public history of the contemporary world. It creates a ludological retelling of the 21st century through 100 games that were announced, launched, and played from the turn of the century. The book analyzes them and then uses the games as a means of entry to examine both key events in the 21st century and the evolution of the gaming industry. Adopting a tri-pronged perspective, the reviewer, the academic, and an industry observer, it studies games as ludo-narratological artefacts and resituates games in a societal context by examining how they affect and are engaged with by players, reviewers, the gaming community, and the larger gaming industry. This book will be a must-read for readers interested in video games, new media, digital culture, culture studies, and history.

*O BRAVE 'NEW NORMAL' WORLD: Living with Coronavirus* Steve Gleadhill, 2025-10-14 It is ironic that having spent several thousand years subjugating all other life forms so we could become the dominant species, we have wilfully ceded our hard-won authority over our fellow animals to inanimate technology. In many cases, we have become so blindly reliant on machines that we have stopped using our own wits to the point where our brains are becoming dangerously redundant. We hardly need to think for ourselves at all. This vacuous mentality that we seem to be embracing is pervading all aspects of our behaviour and society. The rise of AI that now exceeds our own intelligence raises new ethical and existential dilemmas. As we develop synthetic minds, we will need to weigh up how we design them, what we allow, and don't allow them to do, and crucially how to ensure their needs are aligned with our own. Meanwhile, humanity is waging a suicidal war on the natural world according to Secretary-General of the UN Antonio Guterres, which also ultimately jeopardises our very existence.
