MATH

Order of Operations

- Calculations inside parentheses should be performed first.
- Next, do multiplication and division, moving from left to right.
- Then, do addition and subtraction, moving from left to right.

EX:

$$\begin{aligned} 5 + (6 + 4 - 3) - 13 \\ = 5 + (24 - 3) - 13 \\ = 5 + 21 - 13 \\ = 26 - 13 \\ = 13 \end{aligned}$$

- **Explicit:** Clearly stated.
- **Implicit:** Something not clearly stated; indicated subtly.
- **Logic:** The framework of reasoning used to understand ideas.

Craft & Structure

Passage types

- **Persuasive:** Portrays strong opinions to make the reader feel, think, or behave in a certain way.
- **Problem and solution:** Presents a problem and then offers a solution.
EX: Several people in my office have recently come down with the flu. Many of these illnesses could be prevented if people would get the shots before they got the flu and would stay home when they are sick.
The problem is that people in the office are coming down with the flu. The solutions are for people to get flu shots and to stay home when they are sick.
- **Expository:** Informs, explains, or tells how to; uses only facts and examples.
- **Cause and effect:** The cause is why something happened; the effect is what happened.
EX: I won't allow my kids to use social media unless they give me their passwords. They think I'm just being nosy, but they don't realize that I'm trying to protect them from online predators.
In this example, the effect is that the kids can't use social media unless they give the parent their password. The cause is online predators.
- **Compare and contrast:** To compare means that you are looking for similarities; to contrast means that you are looking for differences.
EX: *The Notebook* and *Romeo and Juliet* are both love stories. In both stories, two young people fall in love, and their parents don't approve of their unions. In *Romeo and Juliet*, the two lovers die young by their own hands so that they can be together. In *The Notebook*, the couple grows old together, then wills themselves to die at the same time so that they, too, can be together forever.
When comparing and contrasting the two stories, this passage points out the similarities (young people fall in love; parents don't approve; they die together) and differences (one couple dies young, while the other grows old; one couple dies by their own hands, while the other wills themselves to die together).
- **Narrative:** Tells a story to entertain, inform, or challenge.

Key Terms

- **Fact:** Statement that can be proven.
- **Opinion:** Statement that cannot be proven; has a basis in facts but depends on the author's belief.
- **Bias:** Tendency toward a preconceived idea; emotionally charged words and figurative language.
- **Stereotype:** Biased belief about a person or idea.

Integration of Knowledge & Ideas

Key Terms

- **Primary source:** A firsthand document created at the time in question (e.g., letters, diaries, recordings, and images) that have not been altered from their original state. It is the only thing separating a reader from the creator.
- **Degree of separation:** Number of steps removed from an origin. An original photograph is a primary source, but a book with the photo would be a secondary source, increasing the degree of separation.
- **Prediction:** A reader's guess of what could happen.
- **Inference:** More subtle than a prediction.
- **Theme:** A broad, foundational concept, or universal concern, addressed by the author in a given medium. Ask: "What are the big ideas the artist is engaging with?" "How are those ideas addressed?"
- **Argument:** A point the author believes. Ask: "What am I being asked to do or believe?" Reasons, or evidence, are given to support the argument.

Evaluating Data

- **Ask:** "What data is most relevant to you?"
- **Ask:** "What additional sources of information could help you?"
- **Ask:** "How does all of this fit together, and what does it mean?"

Fractions

Finding the Least Common Denominator (LCD)

- The LCD is the smallest number into which two or more denominators will divide evenly; this number is used for adding and subtracting fractions.

EX: What is the LCD of $\frac{1}{3}$ and $\frac{2}{4}$? The smallest number that is divisible by both 3 and 4 is 12, so the LCD is 12.
