enabling messages to be spread more rapidly and effectively Counter messaging has been promoted as one of the most important measures to neutralize online radicalizing influences and is intended to undermine the appeal of messages disseminated by violent extremist groups While many such initiatives have been launched by Western governments civil society actors and private companies there are many questions regarding their efficacy Focusing predominantly on efforts countering Salafi Jihadi extremism this book examines how feasible it is to prevent or counter radicalization and violent extremism with counter messaging efforts It investigates important principles to consider when devising such a program The authors provide both a comprehensive theoretical overview and a review of the available literature as well as policy recommendations for governments and the role they can play in counter narrative efforts As this is the first book to critically examine the possibilities and pitfalls of using counter messaging to prevent radicalization or stimulate de radicalization it is essential reading for policy makers and professionals dealing with this issue as well as researchers in the field
