

Use the Pedigree below to answer 13-18

13. Write the generation on the pedigree numbers (roman numerals).

The pedigree to the above shows the passing on of Hitchhiker's Thumb in a family. Is this trait dominant or recessive? recessive

14. How do you know? order 2 individuals

15. How are individuals III-1 and III-2 related? husband + wife

16. Name 2 individuals that have hitchhiker's thumb. III-2 III-4

17. Name 2 individuals that were carriers of hitchhiker's thumb. III-1 & III-5

18. Write the genotypes for each individual on the pedigree.

Determining Inheritance Patterns

19. When working through a pedigree, the first thing you need to do is figure out which characteristic is dominant – the shaded one or the un-shaded one. Then you need to choose a letter (let's use A) and begin assigning genotypes. Remember that recessive individuals are always homozygous, so assign their genotypes first, then go back and look at all of the dominant individuals. For some, you will only be able to determine one allele of the genotype, so just write the one capital allele followed by a question mark (A?).
