Peer Interaction and Second Language Learning Jenefer Philp,Rebecca Adams,Noriko Iwashita,2013-11-07 Peer Interaction and Second Language Learning synthesizes the existing body of research on the role of peer interaction in second language learning in one comprehensive volume In spite of the many hours that language learners spend interacting with peers in the classroom there is a tendency to evaluate the usefulness of this time by comparison to whole class interaction with the teacher Yet teachers are teachers and peers are peers as partners in interaction they are likely to offer very different kinds of learning opportunities This book encourages researchers and instructors alike to take a new look at the potential of peer interaction to foster second language development Acknowledging the context of peer interaction as highly dynamic and complex the book considers the strengths and limitations of peer work from a range of theoretical perspectives In doing so Peer Interaction and Second Language Learning clarifies features of effective peer interaction for second language learning across a range of educational contexts age spans proficiency levels and classroom tasks and settings **A Guide to Doing Statistics in Second Language Research Using SPSS and R** Jenifer Larson-Hall,2015-07-24 A Guide to Doing Statistics in Second Language Research Using SPSS and R Second Edition is the only text available that demonstrates how to use SPSS and R as specifically related to applied linguistics and SLA research This new edition is up to date with the most recent version of the SPSS software and now also includes coverage of R a software program increasingly used by researchers in this field Supported by a number of pedagogical features including tip boxes and practice activities and a wealth of screenshots this book takes readers through each step of performing and understanding statistical research covering the most commonly used tests in second language research including t tests correlation and ANOVA A robust accompanying website covers additional tests of interest to students and researchers taking them step by step through carrying out these tests themselves In this comprehensive and hands on volume Jenifer Larson Hall equips readers with a thorough understanding and the practical skills necessary to conducting and interpreting statisical research effectively using SPSS and R ideal for graduate students and researchers in SLA social sciences and applied lingustics For more information and materials please visit www routledge com cw larson hall **Explicit Learning in the L2 Classroom** Ronald P. Leow,2015-02-20 Explicit Learning in the L2 Classroom offers a unique five prong theoretical empirical methodological pedagogical and model building approach to the issue of explicit learning in the L2 classroom from a student centered perspective To achieve this five prong objective the book reports the theoretical underpinnings empirical studies and the research designs employed in current research to investigate the constructs of attention and awareness in SLA with the objectives to 1 propose a model of the L2 learning process in SLA that accounts for the cognitive processes employed during this process and 2 provide pedagogical and curricular implications for the L2 classroom The book also provides a comprehensive treatise of research methodology that is aimed at not only underscoring the major features of conducting

robust research designs with high levels of internal validity but also preparing teachers to become critical readers of published empirical research **Stimulated Recall Methodology in Applied Linguistics and L2 Research** Susan M. Gass,Alison Mackey,2016-09-19 Stimulated Recall Methodology in Applied Linguistics and L2 Research provides researchers and students in second language acquisition and applied linguistics with the only how to guide on using stimulated recalls in their research practice This new edition expands on the scope of the previous edition walking readers step by step through a range of studies in applied linguistics in order to demonstrate the history of stimulated recalls and their efficacy as a data collection tool With its exclusive focus on stimulated recalls coverage of the most up to date research studies and pedagogically rich text design Stimulated Recall Methodology in Applied Linguistics and L2 Research supplies researchers and students with the practical skills to elicit richer data in their own research *Peer Interaction and Second Language Learning* Masatoshi Sato,Susan Ballinger,2016-03-10 This volume represents the first collection of empirical studies focusing on peer interaction for L2 learning These studies aim to unveil the impact of mediating variables such as task type mode of interaction and social relationships on learners interactional behaviors and language development in this unique and pedagogically powerful learning context To examine these issues contributors employed quantitative qualitative and mixed methods designs as well as cognitive social and sociocognitive theoretical frameworks The majority of the studies are classroom based and were conducted in a rich array of settings covering five continents and encompassing a wide range of learner L1s and target languages These settings include second and foreign language classrooms from primary to university level content based programs online contexts and after school programs To span the divide between research and practice each study includes a section suggesting pedagogical implications **Theories in Second Language Acquisition** Bill VanPatten,Jessica Williams,2014-12-22 The second edition of Theories in Second Language Acquisition seeks to build on the strengths of the first edition by surveying the major theories currently used in second language acquisition research This volume is an ideal introductory text for undergraduate and graduate students in SLA and language teaching Each chapter focuses on a single theory written by a leading scholar in the field in an easy to follow style a basic foundational description of the theory relevant data or research models used with this theory common misunderstandings and a sample study from the field to show the theory in practice This text is designed to provide a consistent and coherent presentation for those new to the field who seek basic understanding of theories that underlie contemporary SLA research Researchers will also find the book useful as a quick guide to theoretical work outside their respective domains Conversational Interaction in Second Language Acquisition Alison Mackey,2007-10-04 Conversational Interaction in Second Language Acquisition A Series of Empirical Studies Oxford applied linguistics **Second Language Acquisition Processes in the Classroom** Amy Snyder Ohta,2001-01-01 This book is the first study to examine how interactional style develops within the walls of a foreign language classroom in the first two years of language study Results show learners to be highly sensitive to pragmatic

information and that learners can move toward an appropriate interactional style through classroom interactive experience The book shows how learners are most often sources who offer assistance and correction with errors serving most often to stimulate further thinking about what form is correct Analysis shows learners to be active in seeking corrective information in the classroom setting not only from peer partners but also from the teacher They are active in noticing how the teacher s utterances even when addressed to others contrast with their own and utilize corrective feedback intended for other students In addition the results show that teacher initiated corrective feedback addressed to individual learners is only one source of corrective feedback Learners are shown to be active in both teacher fronted and peer interactive settings In newer L2 teaching methodologies which focus on the use of peer interactive tasks the teacher s role has been de emphasized This book however shows how important the teacher s role is The final chapter examines how the teacher can act to maximize the benefits of peer interactive tasks through how they design tasks and present them to the class First the chapter looks at how learners use English their L1 in the classroom concluding that how teachers present activities to the class has an impact on the amount of L1 used by students during peer interaction Following up on this finding the chapter works to address questions that teachers face in lesson planning and teaching It presents a useful list of questions teachers can ask when designing peer interactive tasks in order to maximize the effectiveness of a wide variety of language learning tasks *A Philosophy of Second Language Acquisition* Marysia Johnson,2008-10-01 divdivHow does a person learn a second language In this provocative book Marysia Johnson proposes a new model of second language acquisition SLA a model that shifts the focus from language competence the ability to pass a language exam to language performance using language competently in real life contexts Johnson argues that current SLA theory and research is heavily biased in the direction of the cognitive and experimental scientific tradition She shows that most models of SLA are linear in nature and subscribe to the conduit metaphor of knowledge transfer the speaker encodes a message the hearer decodes the sent message Such models establish a strict demarcation between learners mental and social processes Yet the origin of second language acquisition is located not exclusively in the learner s mind but also in a dialogical interaction conducted in a variety of sociocultural and institutional settings says the author Drawing on Vygotsky s sociocultural theory and Bakhtin s literary theory she constructs an alternative framework for second language theory research teaching and testing This approach directs attention toward the investigation of dynamic and dialectical relationships between the interpersonal social plane and the intrapersonal individual plane Johnson s model shifts the focus of SLA away from a narrow emphasis on language competence toward a broader view that encompasses the interaction between language competence and performance Original and controversial A Philosophy of Second Language Acquisition offers an introduction to Vygotsky s sociocultural theory and Bakhtin s literary theory both of which support an alternative framework for second language acquisition an examination of the existing cognitive bias in SLA theory and research a radically new model of second language acquisition DIV DIV Key Terms in
