Noll, Andrew Zimbalist, 1997-10-01 America is in the midst of a sports building boom Professional sports teams are demanding and receiving fancy new playing facilities that are heavily subsidized by government In many cases the rationale given for these subsidies is that attracting or retaining a professional sports franchise even a minor league baseball team or a major league pre season training facility more than pays for itself in increased tax revenues local economic development and job creation But are these claims true To assess the case for subsidies this book examines the economic impact of new stadiums and the presence of a sports franchise on the local economy It first explores such general issues as the appropriate method for measuring economic benefits and costs the source of the bargaining power of teams in obtaining subsidies from local government the local politics of attracting and retaining teams the relationship between sports and local employment and the importance of stadium design in influencing the economic impact of a facility The second part of the book contains case studies of major league sports facilities in Baltimore Chicago Cincinnati Cleveland Indianapolis San Francisco and the Twin Cities and of minor league stadiums and spring training facilities in baseball The primary conclusions are first sports teams and facilities are not a source of local economic growth and employment second the magnitude of the net subsidy exceeds the financial benefit of a new stadium to a team and third the most plausible reasons that cities are willing to subsidize sports teams are the intense popularity of sports among a substantial proportion of voters and businesses and the leverage that teams enjoy from the monopoly position of professional sports leagues **Scott Foresman-Addison Wesley Mathematics**, 2008 *Collins Primary Literacy* Karina Law, 2008-04 Collins Primary Literacy Teacher's Guide 2 provides unit by unit teaching sequences to save you time in your planning With clear links to objectives interactive learning ideas and
