Peer Instruction Eric Mazur,1997 Mazur shows teachers how to teach students of physics that they can understand memorization as a different alternative to mathematics He describes interactive teaching including different types of lecturing and group study as a method of teaching physics **Flipped Instruction Methods and Digital Technologies in the Language Learning Classroom** Loucky, John Paul,Ware, Jean L.,2016-09-01 The flipped classroom methodology is one of the latest innovations in the field of education challenging traditional notions of the classroom experience Applying this methodology to language learning has the potential to further engage students and drive their understanding of key concepts Flipped Instruction Methods and Digital Technologies in the Language Learning Classroom explores the latest educational technologies and web based learning solutions for effective language learning curricula Featuring emergent research on critical topics and innovations in the field of education this publication is an essential resource for educators administrators instructional designers pre service teachers and researchers in the field of education *Effective Use of Collective Peer Teaching in Teacher Education* Rolf K Baltzersen,2023-11-01 Effective Use of Collective Peer Teaching in Teacher Education investigates the learning benefits of letting students assume leadership roles in the classroom emphasizing both theoretical analysis and firsthand empirical research conducted with pre service teachers Building on Vygotsky s 1987 sociocultural theory of human learning and research on collective intelligence this volume introduces peer teaching as a pedagogical practice with a significant and underexplored learning potential The first part of this book focuses on findings from two separate teacher education programs while the second analyzes the learning processes through three conceptualized learning positions peer teacher learning peer student learning and collective peer learning Investigating the balance and interaction of these processes this book argues that teaching and learning cannot at length be separated from each other and discusses the practical implications of this idea This book will appeal to researchers faculty and teacher educators with interests in theories of learning and international and comparative education Its crucial insights into how learning can be maximized in the classroom will provide a nuanced picture of the complexity of learning processes The Open Access version of this book available at http www taylorfrancis com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license **International Handbook on Teaching and Learning Economics** Gail Mitchell Hoyt,KimMarie McGoldrick,2012 The International Handbook on Teaching and Learning Economics is a power packed resource for anyone interested in investing time into the effective improvement of their personal teaching methods and for those who desire to teach students how to think like an economist It sets guidelines for the successful integration of economics into a wide variety of traditional and non traditional settings in college and graduate courses with some attention paid to primary and secondary classrooms The International Handbook on Teaching and Learning Economics is highly recommended for all economics instructors and individuals supporting economic education in

courses in and outside of the major This Handbook provides a multitude of rich resources that make it easy for new and veteran instructors to improve their instruction in ways promising to excite an increasing number of students about learning economics This Handbook should be on every instructor s desk and referenced regularly Tawni Hunt Ferrarini The American Economist In delightfully readable short chapters by leaders in the sub fields who are also committed teachers this encyclopedia of how and what in teaching economics covers everything There is nothing else like it and it should be required reading for anyone starting a teaching career and for anyone who has been teaching for fewer than 50 years Daniel S Hamermesh University of Texas Austin US The International Handbook on Teaching and Learning Economics provides a comprehensive resource for instructors and researchers in economics both new and experienced This wide ranging collection is designed to enhance student learning by helping economic educators learn more about course content pedagogic techniques and the scholarship of the teaching enterprise The internationally renowned contributors present an exhaustive compilation of accessible insights into major research in economic education across a wide range of topic areas including Pedagogic practice teaching techniques technology use assessment contextual techniques and K 12 practices Research findings principles courses measurement factors influencing student performance evaluation and the scholarship of teaching and learning Institutional administrative issues faculty development the undergraduate and graduate student and international perspectives Teaching enhancement initiatives foundations organizations and workshops Grounded in research and covering past and present knowledge as well as future challenges this detailed compendium of economics education will prove an invaluable reference tool for all involved in the teaching of economics graduate students new teachers lecturers faculty researchers chairs deans and directors   Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy,Elizabeth S. Charles,James D. Slotta,Nathaniel Lasry,2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i e extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships

between researchers and practitioners who are uniquely positioned as in betweens straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation
