**Case Research Journal** ,2005      *Journal of Engineering Education* ,2001      *Datamation* ,1980      *Assessing Learners Online* Albert Oosterhof,Rita-Marie Conrad,Donald P. Ely,2008 Online assessment and more broadly the entire online learning environment provides expanded opportunities to actively and creatively engage the learner The approach the authors have taken in this book is to work from the established fundamentals of assessment applying these principles to the online environment The authors emphasize basic issues of assessment such as establishing the evidence of validity for assessments but the context of the discussion is always that of an online environment Written by leading technology experts this clear and practical text serves as a training guide for assessing online or distance learners Readers learn how to select what should be assessed how to use written tests and projects to evaluate the skills learners have achieved how to provide feedback to learners and how to efficiently use course management software The authors believe educators involved with online training and education must have the same assessment expectations and standards as those in conventional face to face environments This book is appropriate for instructional designers and educators involved with online training and education as well as for college courses concerned with the design and delivery of distance or other forms of online instruction It also has utility as a personal reference for instructors of courses that assess students online      **Teaching First-Year College Students** Bette LaSere Erickson,Calvin B. Peters,Diane Weltner Strommer,2006-05-19 Revised and expanded edition of Teaching College Freshmen      Collaborative Clinical Education Jane Westberg, PhD,1993 This book is intended for those who are now and those who intend to become clinical teachers in the health professions Its primary focus is the teaching of medical students and residents but the principles discussed apply equally to teaching students in other health professions The main focus is on the process of teaching the strategies and tactics involved in helping others learn and the authors discuss the generic steps strategies and principles of effective teaching that apply in any clinical setting They do however draw numerous examples from clinical education in a variety of settings The authors specifically stress the notion of collaboration an issue closely related to the public s considerable dissatisfaction with the modern health care system to create a more effective responsive system they argue there is a need to change the ways that health care is provided and the

way it is taught A collaborative approach is needed in both health care and medical education one that involves partnerships between clinicians and patients and between teachers and learners Also prominent throughout the book is the idea that clinical education can be planned and conducted in far more systematic ways than is now common An overarching goal of the book is to provide readers with an enlarged set of options to consider using when faced with the inevitable multiplicity of decisions confronting clinical educators
