increases and agricultural transformation increased population density seems to lead to immiserizing effects in these settings Our results show that urban proximity should be considered as an important determinant of the process of agricultural intensification and transformation in developing countries Ensuring Animal Health and Other Services for Efficient and Inclusive Livestock Value Chains in LMICs Isabelle Baltenweck, Bernard Bett, Simeon Kaitibie, 2022-01-28 *Health Care Financing and Affordability in the Emerging Global Markets* Mihajlo (Michael) Jakovljevic, Kyriakos Souliotis, Wim Groot, 2016-04-14 During the recent few decades global economic growth has been driven largely by developing world economies The ones with the most intensive pace of development were marked as emerging markets led by so called BRICS and N 11 countries Such changes inevitably reflected the global health arena A number of issues previously limited to established high income economies became popularly discussed topics on the agendas of public health policy makers across these regions Major challenges remain population aging rising incidence of prosperity diseases lack of universal insurance coverage and particularly provision of just and equitable access to medical care among the poor both in urban and rural communities A significant part of the difficulties faced by these societies are attributed to inefficient resource allocation strategies in health care and unsatisfactory funding strategies This Research Topic was created in order to address the core challenges of medical care financing and its affordability across the emerging global markets Contributions of both undergoing or finished original research as well as review style papers are welcomed All submitted manuscripts should deal with issues relevant to health care economics and policy in recognized global emerging markets Outside the aforementioned key markets BRICS Brazil Russia India China South Africa Next 11 Bangladesh Egypt Indonesia Iran South Korea Mexico Nigeria Pakistan the Philippines Turkey and Vietnam submissions referring to any of the dynamically developing Asian Latin America Eastern Europe or MENA countries are encouraged In addition to a variety of health economic evaluations and health policy analysis methodological and resource use studies are within the Topic scope Health policy considerations should be primarily focused on financing mechanisms and affordability of health care although other surrounding issues such as health insurance reimbursement and cost containment strategies will be considered Data Science for Business and Decision Making Luiz Paulo Favero, Patricia Belfiore, 2019-04-11 Data Science for Business and Decision Making covers both statistics and operations research while most competing textbooks focus on one or the other As a result the book more clearly defines the principles of business analytics for those who want to apply quantitative methods in their work Its emphasis reflects the importance of regression optimization and simulation for practitioners of business analytics Each chapter uses a didactic format that is followed by exercises and answers Freely accessible datasets enable students and professionals to work with Excel Stata Statistical Software and IBM SPSS Statistics Software Combines statistics and operations research modeling to teach the principles of business analytics Written for students who want to apply statistics optimization and multivariate modeling to gain competitive advantages in business Shows how powerful software packages
