

# Ramsey Micro-Tech 2000 Series

## The Total Solution

We introduced the first microprocessor-based belt scale in 1974. Since then, it has been our mission to create the most advanced, versatile and easy-to-use belt scales in the world.

The Micro-Tech 2000 Series represents more than just the next generation of belt scale electronics. It signifies a new approach to scale instrumentation, which gives you more flexibility and vastly increases upgrade capabilities.

## Advanced

Each electronics model in the series is designed for a specific weighing application: belt scales, weigh feeders, impact flow meters, static weighing systems, batch weighing systems, or loss of weight systems.

Because the Micro-Tech 2000 Series use a common platform, you only need to become familiar with one basic interface.

## Versatile

Operational flexibility is provided by numerous programmable features. These features let you customize the electronics to your specific application needs.

## Philosophy

Modern weighing equipment must be capable of interfacing with a variety of peripheral equipment for monitoring, supervisory control and data acquisition purposes. To accommodate these needs, we have designed extraordinary communication capabilities into the Micro-Tech 2000 Series.

These communication capabilities let the Micro-Tech 2000 Series link to intelligent peripheral equipment such as computers, programmable logic controllers, printers, or network systems. The inputs and outputs can be used to drive relays, motor starters, lights, switches, or accept inputs from magnetic card readers, micro-switches, flow/no flow switches, or pushbuttons.

## PC Master

We also provide our custom designed software package, called PC Master, for supervisory control, data acquisition and monitoring. The PC Master is a PC-based system that provides graphic displays of plant operation for the automation of continuous or discrete processes. PC Master can be used with all Ramsey equipment.
