More Fallacies Flaws Flimflam Spectrum:

More Fallacies, Flaws & Flimflam Edward J. Barbeau, 2013-10-16 More Fallacies Flaws and Flimflam is the second volume of selections drawn mostly from the College Mathematics Journal column Fallacies Flaws and Flimflam from 2000 through 2008. The MAA published the first collection Mathematical Flaws Fallacies and Flimflam in 2000. As in the first volume More Fallacies Flaws and Flimflam contains items ranging from howlers outlandish procedures that nonetheless lead to a correct answer to deep or subtle errors often made by strong students. Although some are provided for entertainment others challenge the reader to determine exactly where things go wrong. Items are sorted by subject matter. Elementary teachers will find chapter 1 of most use while middle and high school teachers will find chapters 1, 2, 3, 7 and 8 applicable to their levels. College instructors can delve for material in every part of the book. There are frequent references to the College Mathematics Journal; these are denoted by CMJ.

Mathematical Fallacies, Flaws, and Flimflam Edward Barbeau, 2000-06-15 Through hard experience mathematicians have learned to subject even the most evident assertions to rigorous scrutiny as intuition and facile reasoning can often lead them astray. However the impossibility and impracticality of completely watertight arguments make it possible for errors to slip by the most watchful eye. They are often subtle and difficult of detection. When found they can teach us a lot and can present a real challenge to straighten out. Presenting students with faulty arguments to troubleshoot can be an effective way of helping them critically understand material and it is for this reason that I began to compile fallacies and publish them first in the Notes of the Canadian Mathematical Society and later in the College Mathematics Journal in the Fallacies Flaws and Flimflam section. I hoped to challenge and amuse readers as well as to provide them with material suitable for teaching and student assignments. This book collects the items from the first eleven years of publishing in the CMJ. One source of such errors is the work of students. Occasionally a text book will weigh in with a specious result or solution. Nonprofessional sources such as newspapers are responsible for a goodly number of mishaps particularly in arithmetic especially percentages and probability their use in classrooms may help students become critical readers and listeners of the media. Quite a few items come from professional mathematicians. The reader will find in this book some items that are not erroneous but seem to be. These need a fuller analysis to clarify the situation. All the items are presented for your entertainment and use. The mathematical topics covered include algebra, trigonometry, geometry, probability, calculus, linear algebra and modern algebra.

More Fallacies, Flaws, and Flimflam Edward Barbeau, 2013-01-01 Mistakes in mathematical reasoning taken from a variety of sources are exposed and analysed in this entertaining book. **The Teaching and Learning of Mathematics at University Level** Derek Holton, 2006-04-11 This book is the final report of the ICMI study on the Teaching and Learning of Mathematics at University Level. As such it is one of a number of such studies that ICMI has commissioned. The other Study Volumes cover assessment in mathematics education, gender equity research in mathematics education, the teaching of geometry and history in mathematics education.

All of these Study Volumes represent a statement of the state of the art in their respective areas. We hope that this is also the case for the current Study Volume. The current study on university level mathematics was commissioned for essentially four reasons. First universities world wide are accepting a much larger and more diverse group of students than has been the case. Consequently universities have begun to adopt a role more like that of the school system and less like the elite institutions of the past. As a result the educational and pedagogical issues facing universities have changed. Second although university student numbers have increased significantly there has not been a corresponding increase in the number of mathematics majors. Hence mathematics departments have to be more aware of their students' needs in order to retain the students they have and to attract future students. As part of this awareness departments of mathematics have to take the teaching and learning of mathematics more seriously than perhaps they have in the past. Mathematical Reviews ,2001
