Norm Change International Relations Peacekeeping Ebook:

Brazil as a Rising Power Kai Michael Kenkel, Philip Cunliffe, 2016-01-08 This book examines the normative tensions inherent in upward mobility within the international system focusing particularly on the clash between sovereign self interest and the putatively universal norms associated with international interventions It provides extensive detail and deep analysis of Brazil's nature as a rising power and that nature's implications for how the country crafts its international profile on issues such as intervention In addition the book proposes innovative ways of re organising thematic conceptual and empirical research on the normative behaviour of emergent powers with regard to institutions of global governance and questions of intervention In analysing what distinguishes Brazil as a rising power the contributors begin from the assumption that participation in intervention is an increasingly crucial element in demonstrating the capacity and responsibility for which demand accrues as a state seeks increased international profile As such the debates around intervention serve as an indicative locus for examining the clash of norms that accompanies emergence as a global player The book's approach is to organise the analysis around thematic rather than chronological or praxis based lines using the Brazilian case as an illustrative example capable of extrapolation to other emerging powers such as Turkey India and others This work draws together rich empirical detail with sophisticated and varied conceptual analysis and will be of interest to scholars of international relations Latin American politics and global governance

Norm Change in International Relations John Karlsrud, 2015-12-14 In recent decades there have been several constructivist scholars who have looked at how norms change in international relations However few have taken a closer look at the particular strategies that are employed to further change or looked at the common factors that have been in play in these processes This book seeks to further the debates by looking at both agency and structure in tandem It focuses on the practices of linked ecologies formal or informal alliances undertaken by individuals who are the constitutive parts of norm change processes and who have moved between international organizations academic institutions think tanks NGOs and member states The book sheds new light on how norm change comes about focusing on the practices of individual actors as well as collective ones The book draws attention to the role of practices in UN peacekeeping missions and how these may create a bottom up influence on norm change in UN peacekeeping and the complex interplay between government and UN officials applied and academic researchers and civil society activists forming linked ecologies in processes of norm change With this contribution the study further expands the understanding of which actors have agency and what sources of authority they draw on in norm change processes in international organizations A significant contribution to the study of international organizations and UN peacekeeping as well as to the broader questions of global norms in IR this work will be of interest to students and scholars of international relations alike

China, the UN, and Human Protection Rosemary Foot, 2020-05-28 Over a relatively short period of time Beijing moved from dismissing the UN to embracing it How are we to make sense of the People's Republic of China's PRC

embrace of the UN and what does its engagement mean in larger terms This study focuses directly on Beijing's involvement in one of the most contentious areas of UN activity human protection contentious because the norm of human protection tips the balance away from the UN's Westphalian state based profile towards the provision of greater protection for the security of individuals and their individual liberties The argument that follows shows that as an ever more crucial actor within the United Nations Beijing's rhetoric and some of its practices are playing an increasingly important role in determining how this norm is articulated and interpreted In some cases the PRC is also influencing how these ideas of human protection are implemented At stake in the questions this book tackles is both how we understand the PRC as a participant in shaping global order and the future of some of the core norms which constitute that order

International Law in the Transition to Peace Carina Lamont, 2021-11-14 This book proposes a normative framework specifically designed for the complex and legally uncertain time period between armed conflicts and peace As such it contributes both to the furthering of a jus post bellum framework and to enhanced legal clarity in complex and legally uncertain environments This in turn contributes to strengthened protection engagements and thus to improved prospects of enabling sustainable peace and security in both national and international perspectives The book offers a novel but persuasive argument for a legal framework specific for transitional environments Such legal framework it is argued is warranted in order to enable legal clarity to contemporary and outstanding legal issues as well as to furthering peace efforts in complex environments The legal framework suggested proposes a dividing line between applicable legal frameworks that it is submitted enhances both legal clarity on protection engagements and the quest for sustainable peace The framework proposed is founded on a legal analysis of the protective nature and function of law It thus provides a rare but important perspective on law that is of value in the quest for sustainable peace and security The research draws uniquely on both contemporary legal debates and on peace and conflict research It does so in order to enable legal analysis that is both legally sound as well as appropriate and adequate in today's peace and security realities The book provides a valuable resource for academics researchers and policy makers in the areas of Public International Law International Humanitarian Law International Human Rights Law the law of Peace Operations and Peace and Security Studies

Debating European Security and Defense Policy Maxime H. A. Larivé, 2016-05-13 Dr Lariv questions whether there is such a thing as a European defense and security policy This book analyzes the integration process by clearly illustrating to the reader the two sides of the argument in order to understand the complexity of the problems in the different stages of the creation and implementation of the European defense policy In doing so this study asks the question of why has the process been so halting and of such limited scope Structured in three parts Theories analyzing the theoretical debates raised by the positivist paradigms of neorealism liberalism and constructivism on European security History reflecting on the impacts of the Cold War American foreign policy the 2008 economic crisis and the evolution of European strategy and Actors by looking at the role of European institutions Member States and the CSDP on the

transformation of the European defense policy since 1998 Each chapter is composed of sub questions allowing the reader to grasp the different forces explaining the deepening or lack of the deepening process of the CSDP Ultimately this book offers a unique base for fostering discussion understanding and critical thinking on the CSDP *The Sage International Encyclopedia of Politics and Gender* Lia K. more functional society In a nutshell this volume sheds light on local practice and experiences that can be utilized to meet unique circumstances of countries that have suffered from a destructive conflict The collection will investigate the transition to peace by highlighting the missing links between peacebuilding norms and practice political economy emotions justice and reconciliation

Reinventing Impartiality Marion Lorraine Bowlby Laurence, 2019 This thesis investigates changes in how the norm of impartiality is interpreted on a day to day basis in United Nations peacekeeping operations Historically peacekeepers remained impartial by serving as passive observers distancing themselves from ideological disputes and minimizing involvement in the domestic affairs of host states Yet practices on the ground have changed dramatically in the last two decades Today UN personnel routinely take sides use force and engage in practices that are ideologically prescriptive In the Democratic Republic of the Congo DRC for example UN troops conduct targeted offensive operations against non state armed groups Critics argue that these activities violate the norm of impartiality This criticism elicits a puzzling response from many UN officials they downplay the novelty of new practices insisting that are still perfectly impartial I study this disjuncture between a longstanding norm and practices on the ground by asking how new ways of being impartial emerge spread and become institutionalized in UN peace operations To answer this question I combine insights from the literature on international norms especially theories of norm contestation with newer scholarship from the practice turn in international relations Drawing on evidence from Sierra Leone the DRC Cote d'Ivoire and UN headquarters in New York I argue that new practices emerge through two distinct processes innovation and improvisation The former involves conscious reflection while the latter occurs when practitioners make a series of unconscious incremental adjustments to existing practices New practices then spread through vertical horizontal and what I call managed learning as communities of peacekeepers embrace new standards for judging competence Finally I show that the institutionalization of new practices remains very uneven This variation largely depends on the wider social environment and the degree to which new practices resonate with existing norms and overarching webs of practices

Liberalism and War Andrew Williams, 2013-04-03 Military power is now the main vehicle for regime change The US army has been used on more than 30 different occasions in the post Cold War world compared with just 10 during the whole of the Cold War era Leading scholar Andrew Williams tackles contemporary thinking on war with a detailed study on liberal thinking over the last century about how wars should be ended using a vast range of historical archival material from diplomatic other official and personal papers which this study situates within the debates that have emerged in political theory He examines the main strategies used at the end and in the aftermath of wars by liberal states to consolidate their liberal gains and to prevent the re occurrence of wars with those states they have fought This new study also explores how various strategies revenge restitution reparation restraint retribution reconciliation and reconstruction have been used by liberal states not only to defeat their enemies but also transform them This is a major new contribution to contemporary thinking and action This book will be of great interest to all

students and scholars of politics international relations and security studies The United Nations, Intra-state Peacekeeping and Normative Change Eşref Aksu,2010 This study explores the normative dimension of the evolving role of the United Nations in peace and security and ultimately in governance What is dealt with here is both the UN s changing raison d tre and the wider normative context within which the organisation is located *The United Nations, Intra-state Peacekeeping and Normative Change* Esref Aksu,2010 *Taking Sides in Peacekeeping* Emily Paddon Rhoads,2016-04-29 United Nations peacekeeping has undergone radical transformation in the new millennium Where it once was limited in scope and based firmly on consent of all parties contemporary operations are now charged with penalizing spoilers of peace and protecting civilians from peril Despite its more aggressive posture practitioners and academics continue to affirm the vital importance of impartiality whilst stating that it no longer means what it once did Taking Sides in Peacekeeping explores this transformation and its implications in what is the first conceptual and empirical study of impartiality in UN peacekeeping The book challenges dominant scholarly approaches that conceive of norms as linear and static conceptualizing impartiality as a composite norm one that is not free standing but an aggregate of other principles each of which can change and is open to contestation Drawing on a large body of primary evidence it uses the composite norm to trace the evolution of impartiality and to illuminate the macro level politics surrounding its institutionalization at the UN as well as the micro level politics surrounding its implementation in the Democratic Republic of the Congo site of the largest and costliest peacekeeping mission in UN history Taking Sides in Peacekeeping reveals that despite a veneer of consensus impartiality is in fact highly contested As the collection of principles it refers to has expanded to include human rights and civilian protection deep disagreements have arisen over what keeping peace impartially actually means Beyond the semantics the book shows how this contestation together with the varying expectations and incentives created by the norm has resulted in perverse and unintended consequences that have politicized peacekeeping and in some cases effectively converted UN forces into one warring party among many Taking Sides in Peacekeeping assesses the implications of this radical transformation for the future of peacekeeping and for the UN s role as guarantor of international peace and security **Perspectives on Peacekeeping and Atrocity Prevention** David Curran,Trudy Fraser,Larry Roeder,Robert Zuber,2015-10-01 The current challenges and potential future of peacekeeping in an increasingly complex world take center stage in this far reaching collection Contributors advance a nuanced picture of post conflict environments across different areas of the globe while considering possible deployments of peacekeeping traditional military and UN forces in semi autonomous complementary roles Longstanding debate topics such as the need for a standing UN army and the field implementation of global right to protect concepts are discussed as are emerging ideas in civilian protection atrocity prevention and balancing triage operations with long term peacebuilding efforts Other dispatches chronicle key issues and concerns regarding peacekeeping operations in Brazil China and diverse regions of Africa Included in the coverage Protecting strangers reflections on a

cosmopolitan peacekeeping capacity Towards a standing UN force for peacekeeping Challenges posed by intervention brigades and other coercive measures in support of the protection of civilians Addressing the criminal accountability of peacekeepers The evolution of China's role in peacekeeping and atrocity crime prevention Businesses and investors as stakeholders in atrocity crime prevention Multiple viewpoints a global scope and real world clarity make Perspectives on Peacekeeping and Atrocity Prevention an invaluable resource to advance the work of humanitarians criminologists and students of and professionals in international relations This collection of articles effectively points to the challenges complexities and sensitivities of preventing and halting mass atrocity crimes in part through the use of UN peacekeeping operations The volume also inspires further efforts including the integration of new and younger stakeholders to mitigate massive human rights crimes and fully implement the Responsibility to Protect Dr Gyrgy Tat r Chair Budapest Centre for the International Prevention of Genocide and Mass Atrocities In a refreshing and engaging manner this edited volume represents a much needed contribution to the debate on how best to address current security threats given the limitations and the possibilities of peacekeeping and atrocity prevention A compelling feature of the book is its exploration of often neglected stakeholder perspectives alongside first hand knowledge of the UN system and astute academic observations of key peacekeeping concepts mandates and practices Each chapter's concluding recommendations invite scholars and policy makers to critically interrogate their own beliefs assumptions and preferred solutions for keeping the peace and preventing mass atrocity violence Dr Maria Stern Professor in Peace and Development Studies School of Global Studies University of Gothenburg

Intrusive Impartiality Assistant Professor in the Department of Political Science Marion Laurence, 2024-11-29 Impartiality is a central norm in United Nations peace operations that has long been associated with passive monitoring of cease fires and peace agreements In the twenty first century however its meaning has been stretched to allow for a range of forceful intrusive and ideologically prescriptive practices In Intrusive Impartiality Marion Laurence explains how these new ways of being impartial emerge how they spread within and across missions and how they become institutionalized across UN peace operations In doing so Laurence sheds light on controversial changes in peacekeeping practice and provides an innovative framework for studying authority and change in global governance **Linked**
