

North Star BlueScope Steel Selects BIRT to Improve Operational Efficiency and Leverage IBM Maximo

"When I saw a demo of tools Actuate provided, I knew right away it would increase visibility of our essential operations and help the management team run the business with improved operational efficiency and agility. Establishing a single reporting framework and dashboards became a top priority for our development staff."

— Miguel Alvarez, NSBSL President

North Star BlueScope Steel LLC (NSBSL) is a steel manufacturer that prides itself on its safety, track record of on-time delivery performance and customer satisfaction. But NSBSL began to struggle to achieve these objectives without a standard business intelligence (BI) solution to empower its employees and management team.

NSBSL leverages IBM Maximo® Asset Management to manage asset life cycle and maintenance, work orders, inventory, purchasing and accounts payable. Critical business information resides in the Maximo system, as well as in multiple other enterprise applications.

Challenges

"We have a very hands-on, entrepreneurial culture, such that if an employee is asked to complete a task, they just figure it out and get the job done. However, this environment impacts our standardization efforts, and has

resulted in information remaining in silos throughout the organization" states Brian Baird, a Certified Maintenance and Reliability Professional at NSBSL.

NSBSL executives and management wanted a unified view and understanding of the business operations. However, NSBSL did not have a solution that could collect this information and deliver it in an integrated, easy-to-use format. NSBSL employees had to follow manual processes which were time-consuming and error prone in order to bring the information together for analysis. And management often did not know the source of the information collected and what assumptions were used when analyzing the data.

"We needed a solution that would empower people to do their jobs by providing the right information when they need it, where they are and in the form required to get the job done," recalls Baird.
