**Print Quarterly** ,2009     **Hide Your Children** Liz Wheeler,2023-09-26 Having conquered all the major institutions of our culture the left is closing in on its final frontier your children In this new book Liz Wheeler exposes where the forces of wokeness are at work and explains how parents can fight back for a change Everything is on the line Despite the occasional victory conservatives are on the defensive on every front of the culture wars especially America s schools Planned Parenthood is funding gender theory indoctrination groomer teachers are introducing youngsters to pornography Disney executives are bragging about their queerness agenda and teacher s unions are poisoning young minds with racism If someone doesn t stand up and fight these ideas will be the norm for a new generation A distressing number of parents refuse to see how depraved our schools have become The next generation will determine the fate of the American experiment in ordered liberty Will they pass it on to their children or will we lose our nation forever Parents and their allies must go on the offensive in this existential fight Fortunately they have the truth on their side It is not too late     *The Adjunct Underclass* Herb Childress,2019-03-29 Class ends Students pack up and head back to their dorms The professor meanwhile goes to her car to catch a little sleep and then eat a cheeseburger in her lap before driving across the city to a different university to teach another wholly different class All for a paycheck that once prep and grading are factored in barely reaches minimum wage Welcome to the life of the mind in the gig economy Over the past few decades the job of college professor has been utterly transformed for the worse America s colleges and universities were designed to serve students and create knowledge through the teaching research and stability that come with the longevity of tenured faculty but higher education today is dominated by adjuncts In 1975 only thirty percent of faculty held temporary or part time positions By 2011 as universities faced both a decrease in public support and ballooning administrative costs that number topped fifty percent Now some surveys suggest that as many as seventy percent of American professors are working course to course with few benefits little to no security and extremely low pay In The Adjunct Underclass Herb Childress draws on his own firsthand experience and

that of other adjuncts to tell the story of how higher education reached this sorry state Pinpointing numerous forces within and beyond higher ed that have driven this shift he shows us the damage wrought by contingency not only on the adjunct faculty themselves but also on students the permanent faculty and administration and the nation How can we say that we value higher education when we treat educators like desperate day laborers Measured but passionate rooted in facts but sure to shock The Adjunct Underclass reveals the conflicting values strangled resources and competing goals that have fundamentally changed our idea of what college should be This book is a call to arms for anyone who believes that strong colleges are vital to society *English Religious Poetry Printed 1477-1640* Roman Rudolph Dubinski,1996

**A New English Dictionary on Historical Principles** ,1897 *The Interaction Field* Erich Joachimsthaler,2020-09-15 Learn how the most successful businesses are

creating value and igniting smart growth in a fast paced competitive market Most businesses today focus on competition and disruption instead of collaboration participation and engagement They focus on transactions instead of interactions They seek to optimize or extract value rather than share it They build assets and thrive on enormous scale huge distribution networks and brand recognition But then along comes a rival that doesn t care much about your brand and your other assets and it either rushes past you or mows you down In The Interaction Field management expert and professor Erich Joachimsthaler explains that the only way to thrive in this environment is through the Interaction Field model Companies who embrace this model generate facilitate and benefit from data exchanges among multiple people and groups from customers and stakeholders but also from those you wouldn t expect to be in the mix like suppliers software developers regulators and even competitors And everyone in the field works together to solve big industry wide or complex and

unpredictable societal problems The future is going to be about creating value for everyone Businesses that solve immediate challenges of people today and also the major social and economic challenges of the future are the ones that will survive and grow     *Time & Tide* Helen A.
