**Self Service Reporting in Dynamics Ax 2012 Using Excel and Power BI** Murray Fife, 2015-11-05

Having users perform their own reporting has been a dream on both sides of the organization. The IT group doesn't particularly like creating reports for the users when they could be spending their time on cooler projects and users don't particularly like waiting for IT to create the reports that they need to track the data because it's never quite what they wanted and also takes so long to get because of the first reason that it's usually out of date. If only there was a solution. Well, there is because there are so many tools built into Dynamics AX and also the productivity tools like Excel and Word that the users can easily create their own reports themselves without having to get the IT group involved. Everybody wins. In this guide we will show you how the users can do just that; it's so easy that they may not even realize that they are creating reports.
