Excessive Pricing and Competition Law Enforcement Yannis Katsoulacos, Frédéric Jenny, 2018-09-12 This volume examines the controversy surrounding the use of competition law to combat excessive pricing. While high or monopolistic pricing is not regarded as an antitrust violation in the US employing abuse of dominance provisions in competition laws to fight excessive pricing has gained popularity in some BRICS jurisdictions and a number of EU member states in recent years. The book begins by discussing the economic arguments for and against the prohibition of excessive or unfair prices by firms with market power. It then presents various country studies focusing on developed countries such as the UK and Israel and on the BRICS countries to highlight various practical challenges involved in recognizing excessive prices as abusive conduct on the part of dominant firms including how to define, measure and identify excessive prices. The contributors also discuss other policy options that can be used to fight excessive prices in order to protect consumer welfare.

*Advances in Networks, Intelligence and Computing* Ashok Kumar, Geeta Sharma, Anil Sharma, Pooja Chopra, Punam Rattan, 2024-05-24 The year 2023 marks the 100th birth anniversary of E F Codd. 19 August 1923 – 18 April 2003 a computer scientist who while working for IBM invented the relational model for database management the theoretical basis for relational databases and relational database management systems. He made other valuable contributions to computer science but the relational model a very influential general theory of data management remains his most mentioned, analyzed and celebrated achievement. Unhelkar, 2024-07-30 This is an open access book International Conference on Computational Innovations and Emerging Trends ICCIET 2K24 ICCIET 24 has emerged as an enduring techno platform to connect education experts and passionate educators all over the world for improving the potential for excellence in engineering education. It provides a premier interdisciplinary forum for researchers, engineers, academicians to present and discuss the most recent trends, innovations, concerns, practical challenges, and encountered solutions adopted in the field of Computational Intelligence with its allied areas. The conference also aims to provide a platform for scientists, scholars, students from universities all around the world and the industry to present ongoing research activities and hence to foster research relations between the universities and the industry. Scope of the Conference The conference focuses on mutually sharing the advances and innovative technologies for the scientists, scholars, engineers, and students from different universities and industry practitioners to present ongoing research activities in the recent trends of Computer Science and Engineering. This conference addresses the relevant topics and research issues in the vicinity of Computational Intelligence and hence to foster collaborations among stakeholders and researchers from distinct universities, national laboratories, government funding bodies, and the industry. *Recent Research in Management, Accounting and Economics (RRMAE)* Hafinaz, Hariharan R., R. Senthil Kumar, 2025-03-07 The conference brought together innovative academics and industrial experts to present novel contributions related to real world aspects of Economics, Management, and Accounting. The primary goal of the conference was to promote research and developmental activities in these three fields. Another goal was to promote scientific information interchange between researchers, developers, engineers, students, and practitioners working in and around the world.

**Innovation in Pricing** Andreas Hinterhuber, Stephan M. Liozu, 2017-08-08 Pricing has a substantial and immediate impact on profitability. Most companies however still use costs or competition as their main basis for setting prices. Product or business model innovation has a high priority for many companies yet innovation in pricing received scant attention until the first edition of this groundbreaking book. This new edition of *Innovation in Pricing* builds on the success of the first, examining the ways in which pricing innovation can drive profits through cutting edge academic research and best practice case studies from leading academics, business practitioners, and consultants in pricing. The second edition has been fully revised and updated according to the latest developments in pricing, with revisions to all chapters, new chapters including a chapter on business model and pricing model innovation, a new introduction that makes explicit just what strategic pricing can do for your organization. This book is the only book dedicated to innovation in pricing and is an essential read for business executives, innovation managers, and pricing managers wishing to treat innovation in pricing as seriously as they treat product, service, or business model innovation. It is also valuable supplementary reading for advanced students of marketing and sales. *The Iron Age*, 1896
