Meade, 2012-11-12 First published in 1971 this volume applies the tools of static and of dynamic analysis outlined in The Stationary Economy and The Growing Economy to the control of a dynamic economy This involves a discussion of subjects such as the theory of indicative planning and the planning by the government of its monetary fiscal and incomes policies for the purposes of the short run stabilization of the economy and of ensuring the best long run use of the community's resources Special emphasis is laid on the planning of such policies in conditions in which many future events remain inevitably uncertain This book considers these issues in relation to a competitive free enterprise economy and little or no reference is made to problems of monopoly or of distinctions between social and private costs and benefits due to indivisibilities and externalities in economic life **Reports of Cases Argued and Determined in the Supreme Court of the State of**
