poised in 1900 to be a leader in automotive production Clean odorless noiseless and mechanically simple electrics rarely broke down and were easy to operate An electric car could be started instantly from the driver s seat no other machine could claim that advantage But then it all went wrong As this history details the hope and confidence of 1900 collapsed and just two decades later electric cars were effectively dead They had remained expensive even as gasoline cars saw dramatic price reductions and the storage battery was an endless source of problems An increasingly frantic public relations campaign of lies and deceptive advertising could not turn the tide

**Taking Charge** Michael B. Schiffer, 1994-02-01 Describes the history and future promise of electric cars in the U S Charting the early trajectory of the electric auto from 1895 to 1920 Schiffer argues that its failure had as much to do with money and gender as with technological shortcomings In the late 19th cent electric autos scurried through several NE cities their quiet engines and easy operation preferable to horse drawn carriages and the temperamental ways of gas powered vehicles With a range of 50 100 miles by 1910 electrics were perfect for in town errands especially for women During the same period automobilists mostly men championed the range and speed of the gas engine esp for touring and racing In the end it was culture more than technology that stymied the electric car Illus
