Financial Aid Price Promo:

Redesigning the Financial Aid System Robert B. Archibald,2002-12-13 Archibald argues that one of the problems with the current model in which universities are responsible for the majority of grants while the federal government provides student loans is that a student cannot know the final price of attending a given institution until after he or she has applied been accepted and received a financial aid offer As a result students remain largely uninformed about the cost of their college educations until very late in the decision making process and thus have difficulty making a timely choice In addition financial aid information is kept private creating confusion over the price of a college education and the role of financial aid

college enrollment paint a different picture. Students from low income families are less likely to graduate from high school and go on to college and low income students who do attend a post secondary institution are most likely to enroll in public community college rather than an elite school. College Access Opportunity or Privilege addresses the problem of unequal educational opportunity in the U.S. through essays and studies detailing the disadvantages of our country's low income students. Back by quantitative data and expert analyses College Access highlights the underlying problems while presenting opportunities for positive change. The authors analysts of higher education and economic policy discuss various models colleges can use to educate low income students and argue that it is imperative to give these students full access to high cost colleges as well as low cost ones in order for the country to remain globally competitive.
