*AI and Assembly* Toussaint Nothias, Lucy Bernholz, 2025-07-08 Artificial intelligence has moved from the lab into everyday life and is now seemingly everywhere As AI creeps into every aspect of our lives the data grab required to power AI also expands People worldwide are tracked analyzed and influenced whether on or off their screens inside their homes or outside in public still or in transit alone or together What does this mean for our ability to assemble with others for collective action including protesting holding community meetings and organizing rallies In this context where and how does assembly take place and who participates by choice and who by coercion AI and Assembly explores these questions and offers global perspectives on the present and future of assembly in a world taken over by AI The contributors analyze how AI threatens free assembly by clustering people without consent amplifying social biases and empowering authoritarian surveillance But they also explore new forms of associational life that emerge in response to these harms from communities in the US conducting algorithmic audits to human rights activists in East Africa calling for biometric data protection and rideshare drivers in London advocating for fair pay Ultimately AI and Assembly is a rallying cry for those committed to a digital future beyond the narrow horizon of corporate extraction and state surveillance **Don't Use Your Words!** Jane

Juffer, 2019-05-28 How children are taught to control their feelings and how they resist this emotional management through cultural production Today even young kids talk to each other across social media by referencing memes songs and movements constructing a common vernacular that resists parental educational and media imperatives to name their feelings and thus control their bodies Over the past two decades children's television programming has provided a therapeutic site for the processing of emotions such as anger but in doing so has enforced normative structures of feeling that Jane Juffer argues weaken the intensity and range of children's affective experiences Don't Use Your Words seeks to challenge those norms highlighting the ways that kids express their feelings through cultural productions including drawings fan art memes YouTube videos dance moves and conversations while gaming online Focusing on kids between ages five and nine Don't Use Your Words situates these productions in specific contexts including immigration policy referenced in drawings by Central American children just released from detention centers and electoral politics as contested in kids artwork expressing their

anger at Trump's victory Taking issue with the mainstream tendency to speak on behalf of children Juffer argues that kids have the agency to answer for themselves what does it feel like to be a kid
