An Invitation to the Rogers-Ramanujan Identities Andrew V. Sills, 2017-10-16. The Rogers-Ramanujan identities are a pair of infinite series/infinite product identities that were first discovered in 1894. Over the past several decades, these identities and identities of similar type have found applications in number theory, combinatorics, Lie algebra and vertex operator algebra theory, physics especially statistical mechanics and computer science especially algorithmic proof theory. Presented in a coherent and clear way, this will be the first book entirely devoted to the Rogers-Ramanujan identities and will include related historical material that is unavailable elsewhere.
