**DO IT YOURSELF** Ogan Davids, 2020-07-13 It has been stated that information is the currency of the 21st century and billions of words are added every minute to the mountains of words in the library of human existence This mountain at most can be very intimidating and mind boggling and navigating through the burrows and rows of words in this library searching for new information or knowledge can be very daunting No wonder through the help of technology the world is gradually moving from Do it for us to Do it yourself But doing it yourself requires skills time patience and resilience Since it has no doubt increasingly become difficult for people to do research online access relevant information or develop new skills probably due to the constraint of time It is our quest to help you overcome all these constraints which gave birth to the book DO IT YOURSELF Do it yourself is the most comprehensive guide of How to s in any subject matter that is of interest to you We gracefully understand what it takes to browse through thousands or even millions of pages online looking for information on the new skill you want to acquire or the new information you want to access we have therefore save you time and money by compiling all the information in a book form to save you millions of hours of research data and loss of quality time with loved ones Do it yourself is therefore aimed at helping you achieve more and become better with less efforts which will directly or indirectly change your way of thinking for the betterment of your life and that of others **Digital Content**

**Marketing** Agata Krowinska, Christof Backhaus, Benjamin Becker, Fabian Bosser, 2023-11-23 Digital Content Marketing Creating Value in Practice introduces the principles of the content marketing discipline and serves as a guide to any professional or student who wants to learn how to successfully plan and implement digital content marketing strategies and tactics Filled with contemporary examples of the most successful creative content marketing practices case studies and professional advice from subject experts this text offers an in depth view of the world of content marketing from a value based perspective The textbook also includes practical advice on content marketing ideation content management and content curation as well as offering recommendations for the best content marketing software The textbook offers a good balance of both theory and practice and is suitable for advanced undergraduate students and postgraduate students studying content marketing digital marketing or social media marketing Support material includes an instructor manual chapter by chapter PowerPoint slides and a test bank of exam questions **Digital Capitalism and New Institutionalism** Daniil

Frolov, 2023-12-19 Modern institutional economics was created to study the institutions of pre digital economies and is based on reductionist approaches But digital capitalism is producing institutions of unprecedented complexity This book argues therefore that not only the economic institutions themselves but also the theoretical foundations for studying those institutions must now be adapted to digital capitalism The book focuses on the institutional complexity of digital capitalism developing an interdisciplinary framework which brings together cutting edge theoretical approaches from philosophy first of all object oriented ontology sociology especially actor network theory evolutionary biology and cognitive science In particular

the book outlines a new approach to the study of institutional evolution based on extended evolutionary synthesis a new paradigm in evolutionary biology which is now replacing neo Darwinism The book develops an enactivist notion of extended cognition and cognitive institutions rejecting the individualistic and mechanistic understanding of economic rationality in digital environments The author experiments with new philosophical approaches to investigate institutional complexity for example the ideas of the flat ontology and the assemblage theory The flat ontology approach is applied to the study of human robot institutions as well as to thinking about post anthropocentric institutional design Assemblage thinking allows for a new much less idealistic look at blockchain and smart cities Blockchain as digital institutional technology is considered in the book not from the viewpoint of minimizing transaction costs as is customary in the modern institutional economics but by using the theory of transaction value which focuses on improving the quality of digital transactions The book includes a wide range of examples ranging from metaverses cryptocurrencies and big data to robot rules smart contracts and machine learning algorithms Written for researchers in institutional economics and other social sciences this interdisciplinary book is essential reading for anyone interested in the interplay of institutional and digital change
