This powerful volume counters the fear of the unknown by providing concrete information on what breast cancer survival looks and feels like. Amelia Davis's bold photographs equip those facing surgery with real information on what to expect on reconstructive options and on lymphedema a frequent result of mastectomy. This essential book also provides companions in arms for newcomers to the battle against cancer. Behind each photograph behind each story is a woman who triumphed. Their battle wounds serve as reminders of the resilience of the female spirit and as symbols of survival perseverance and strength. Some have undergone reconstructive surgery or been fitted with prostheses some have not. All have struggled with cancer's wide ranging impact on their bodies their relationships and their daily lives. Posing for this book is sort of like coming out a twenty eight year old subject of this book reports. By taking a stand to make breast cancer visible rather than hidden *The First Look* affirms the human body as an art form not only as it was created but also as it is reshaped in the course of a life.

**American Book Publishing Record**, 2005 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1970 First multi year cumulation covers six years 1965-70. **Contemporary Obstetrics and Gynecology for Developing Countries** Friday Okonofua, Joseph A. Balogun, Kunle Odunsi, Victor N. Chilaka, 2021-08-05 This book is a comprehensive and easy to read guide to obstetrics and gynecology in developing countries. Although significant progress has been made towards the reduction of maternal mortality and morbidity globally.

they are still unacceptably high in developing countries. This can be directly or indirectly tied to poor quality maternal health care and lack of access to cost effective comprehensive healthcare. Health practitioners in developing countries also contend with trying to keep abreast of recent developments in obstetrics and gynecology while dealing with lack of time resources and access to relevant information. This textbook was thus created by experts in obstetrics and gynecology with extensive experience in African clinical settings and consultants in developed countries to teach proper and accurate diagnosis, treatment and management of gynecologic and obstetric health issues within the context of developing countries. This second edition has been fully updated throughout with an added 25 chapters that cover topics such as reproductive health, gynecological cancers and research methods. The book is divided into six sections: Women's Reproductive Health, Obstetrics, Medical and Surgical Disorders in Pregnancy, General Gynecology, Gynecological Malignancies, Health Systems Organization, Research Methodology and Biostatistics. These section topics have been carefully covered by expert authors with the use of valid scientific data, policy instruments and adapted to the cultural and social context of developing countries with particular in-depth coverage of conditions that have greater prevalence and incidence in developing countries. Each chapter also focuses on filling gaps in knowledge with a distinct pedagogical approach starting with a set of learning objectives and ending with key takeaways for the chapter. This is an ideal guide for residents, medical students, practitioners of obstetrics and gynecology, midwives, general practitioners and pediatricians, particularly those working in developing countries.
