

# Considerations for Group, Concurrent, and Individual Therapy

The Centers for Medicare & Medicaid Services (CMS) supports the clinical judgement of the practitioner. Refer to coverage rules by the payer for more details.

Individual Therapy	Group Therapy	Concurrent Therapy
<b>Clinical &amp; Regulatory Overview</b>		
Should be the primary mode of evaluation and intervention	Appropriate for clients when implemented to address client-specific goals.	May be appropriate for some clients and some goals.
<b>Clinical Considerations</b>		
The typical 30 intervention session should be individual. Any occupation-based intervention that includes safety concerns is likely best completed in an individual setting.	<p>Provide interventions in group to the right clients at the right time.</p> <p>When identifying clients for group interventions, provide an activity analysis of the group intervention considering the clients:</p> <ul style="list-style-type: none"> <li>Individual goals &amp; current functional capacity</li> <li>Psychosocial needs and benefits of treatment in group</li> <li>Functional migration &amp; sensory impairments (e.g., vision, hearing)</li> </ul> <p>Carefully consider the number of clients in the group. More complex clients or clients with lower functional capacity may benefit from a smaller group.</p> <p>Clients at different stages of rehabilitation may benefit from being together in groups to share the lived experience and recovery through rehabilitation.</p> <p>The group intervention should be directed at a specific goal in each client's plan of care. (The goals do not need to be the same or even similar for all clients.)</p> <p>Each client in the group should be able to meaningfully participate with the assistance of the practitioner throughout the group. Interventions must be skilled and medically necessary.</p>	<p>Interventions should be directed at a specific goal for each client. The interventions must be skilled and medically necessary.</p> <p>Indicated when clients are working on mastering a skill or occupation. Should be avoided for novel interventions and any time hands-on assistance is needed.</p> <p>Concurrent therapy may only be a portion of an intervention session and is adjunct to individual interventions.</p> <p>AOTA recognizes concurrent interventions to be the best often implemented model of occupational therapy.</p> <p>Medicare Part B does not recognize concurrent interventions.</p>
<b>Documentation Considerations</b>		
Documentation should demonstrate the skill and distinct value of occupational therapy.  See AOTA Documentation & Reimbursement Resources: <a href="http://www.aota.org/Practice/Management.aspx">www.aota.org/Practice/Management.aspx</a>	<p>Documentation of group interventions should include:</p> <ul style="list-style-type: none"> <li>how the prescribed skilled therapy services contribute to the patient's anticipated progression toward individualized goals</li> <li>why group is the most appropriate mode of therapy for the person</li> <li>how the group therapy is medically necessary and appropriate to the needs of each beneficiary</li> </ul> <p>When groups are provided in a skilled nursing facility (SNF) setting, there is a requirement for an explicit justification for the use of group rather than individual or concurrent therapy. This description should include, but need not be limited to:</p> <ul style="list-style-type: none"> <li>the specific benefits to that particular person</li> <li>the documented type and amount of group therapy</li> <li>how the prescribed type and amount of group therapy will meet the patient's needs and assist the patient in reaching the documented goals</li> </ul>	<p>Clearly document the portion of therapy in the intervention sessions that was provided concurrently.</p> <p>Clearly document the time that a skilled intervention and is directly connected to at least one individualized goal in the plan of care. Note that a client performing tasks independently is typically not skilled therapy.</p>
<b>Skilled Nursing Facilities: New Definitions and Special Considerations for Medicare Part A</b>		
A minimum of 70% of therapy must be provided one-on-one.  "Individual therapy is the preferred mode of therapy intervention and should be considered the standard of care in therapy services provided in SNF settings." (CMS, 84 Fed. Reg. 38728, 38740-38750, 2019)	A maximum of 20% of therapy may be provided in group and concurrent therapy combined.  "Under the SNF PPS, group therapy will be defined as [an individual] group rehabilitation therapist or therapy assistant treating two to six patients at the same time who are performing the same or similar activities." (CMS, 84 Fed. Reg. 38728, 38740-38750, 2019)	A maximum of 20% of therapy may be provided in group and concurrent combined.  "Therapy is provided to two patients by one therapist or therapy assistant during different activities." (CMS, 84 Fed. Reg. 38728, 38740-38750, 2019)
