Síthigh, 2017-09-13 Why should anyone care about the medium of communication today especially when talking about media law In today's digital society many emphasise convergence and seek new regulatory approaches In Medium Law however the medium theory insights of Harold Innis Marshall McLuhan and the Toronto School of Communication are drawn upon as part of an argument that differences between media and technological definitions continue to play a crucial role in the regulation of the media Indeed Mac Síthigh argues that the idea of converged cross platform medium neutral media regulation is unattainable in practice and potentially undesirable in substance This is demonstrated through the exploration of the regulation of a variety of platforms such as films games video on demand and premium rate telephone services Regulatory areas discussed include content regulation copyright tax relief for producers and developers new online services conflicts between regulatory systems and freedom of expression This timely and topical volume will appeal to postgraduate students and postdoctoral researchers interested in fields such as Law Policy Regulation Media Studies Communications History and Cultural Studies **Perspectives on Film Distribution in the U.S.** Loubna Berrada (S.M.), 2016 I believe film has the

power to transform people's lives and minds and to enlighten today's generation like any other medium This is why I wanted to write my thesis about film distribution as it will determine the future of the industry itself The way films are distributed accessed and consumed will be critical in shaping our future entertainment culture and the way we approach content The goal of this thesis is to analyze current distribution models consumer behaviors and distributors marketing efforts to try anticipating the best models for the film industry I also want to explore what the changes in the distribution landscape mean for the creatives and the content creation in overall I will focus my analysis on movie distribution in the United States as I consider this country to be the most changing and dynamic market in the whole industry Trends and practices in the US

should be predictive of future distribution and consumption models in international territories In addition to the high number of articles that helped me for this thesis I will very often refer to Chuck Tryon s *On Demand Culture Digital Delivery and the Future of Movies* 2013 and Anita Elberse s *Blockbusters Why Big Hits and Big Risks are The Future of the Entertainment Business* 2013 Understanding Media in the Digital Age Everette E.
