On The Causes Of War

Greg Cashman, Leonard C. Robinson

On The Causes Of War:

Causes of War Jack S. Levy, William R. Thompson, 2011-09-15 Written by leading scholars in the field *Causes of War* provides the first comprehensive analysis of the leading theories relating to the origins of both interstate and civil wars Utilizes historical examples to illustrate individual theories throughout Includes an analysis of theories of civil wars as well as interstate wars one of the only texts to do both Written by two former International Studies Association Presidents **An Introduction to the Causes of War** Greg Cashman, Leonard C. Robinson, 2021-04-07 This pioneering book now thoroughly updated to incorporate important research explains the causes of war through a sustained combination of theoretical insights and detailed case studies Cashman and Robinson find that while all wars have multiple causes certain factors typically combine in identifiable dangerous patterns Through their examination of World War I World War II in the Pacific the Six Day War the Indo Pakistani War of 1971 the Iran Iraq War and the US invasion of Iraq the authors lay out the complex multilevel processes by which disputes between countries erupt into bloody conflicts Ideal for a range of courses in international relations at both the undergraduate and graduate levels this focused text clearly explains theory and applies it to concrete case study examples in a way that allows students to fully understand the origins of war *Causes of War* Stephen Van Evera, 2013-01-14 What causes war How can military conflicts best be prevented In this book Stephen Van Evera frames five conditions that increase the risk of interstate war false optimism about the likely outcome of a war a first strike advantage fluctuation in the relative power of states circumstances that allow nations to parlay one conquest into another and circumstances that make conquest easy According to Van Evera all but one of these conditions false optimism rarely occur today but policymakers often erroneously believe in their existence He argues that these misperceptions are responsible for many modern wars and explores both World Wars the Korean War and the 1967 Mideast War as test cases Finally he assesses the possibility of nuclear war by applying all five hypotheses to its potential onset Van Evera's book demonstrates that ideas from the Realist paradigm can offer strong explanations for international conflict and valuable prescriptions for its control *On the Causes of War* Hidemi Suganami, 1996 *On the Causes of War*, 1938 *On the Causes of War* Hidemi Suganami, 1996 This is an analysis of one of the fundamental questions of international relations what causes war The author draws upon historical statistical and philosophical perspectives to produce an innovative new theory **Human Nature and the Causes of War** John David Orme, 2018-04-07 What are the causes of war Wars are generally begun by a revisionist state seeking to take territory The psychological root of revisionism is the yearning for glory honor and power Human nature is the primary cause of war but political regimes can temper or intensify these passions This book examines the effects of six types of regime on foreign policy monarchy republic and sultanistic charismatic and military and totalitarian dictatorship Dictatorships encourage and unleash human ambition and are thus the governments most likely to begin ill considered wars Classical realism modified to incorporate the impact of regimes and beliefs provides a more convincing explanation of war

than neo realism *On the Causes of War* Hidemi Suganami, Emeritus Professor of International Politics Hidemi Suganami, 1996 This is an analysis of one of the fundamental questions of international relations what causes war The author draws upon historical statistical and philosophical perspectives to produce an innovative new theory *The Causes of Wars and Other Essays* Michael Howard, 1984 Public consciousness of the threat of nuclear war is rising steadily Responses to the nuclear dilemma are conflicting and often confusing Never have we been more in need of information and perspective for if we wish to avoid war we must understand it Michael Howard offers an analysis of our present predicament by discussing those issues that cause war and make peace His book includes an examination of nuclear strategy today views of the past about the conduct of international relations ethics modes of defense and studies of military thinkers and leaders The Causes of Wars illuminates the interrelationship between men and ideas between war and other social forces and between our present situation and its roots in the past What Causes War? Greg Cashman, 2013-07-29 Now in a thoroughly revised and updated edition this classic text presents a comprehensive survey of the many alternative theories that attempt to explain the causes of interstate war For each theory Greg Cashman examines the arguments and counterarguments considers the empirical evidence and counterevidence generated by social science research looks at historical applications of the theory and discusses the theory's implications for restraining international violence Among the questions he explores are Are humans aggressive by nature Do individual differences among leaders matter How might poor decision making procedures lead to war Why do leaders engage in seemingly risky and irrational policies that end in war Why do states with internal conflicts seem to become entangled in wars with their neighbors What roles do nationalism and ethnicity play in international conflict What kinds of countries are most likely to become involved in war Why have certain pairs of countries been particularly war prone over the centuries Can strong states deter war Can we find any patterns in the way that war breaks out How do balances of power or changes in balances of power make war more likely Do social scientists currently have an answer to the question of what causes war Cashman examines theories of war at the individual substate nation state dyadic and international systems level of analysis Written in a clear and accessible style this interdisciplinary text will be essential reading for all students of international relations **On the Causes of War** Michael Andrej, Hanna Newcombe, 1999 On the Causes of War Michael Andrej, **The Causes of War**, 1961 Analyzing the Causes of War Assistant Professor of Government Jack S. Levy, Jack S. Levy, 2018-05-07 This volume is a collection of some of the most influential essays by Jack Levy on the causes of interstate war These studies focus on the role of power in the international system the domestic sources of security policy and war and the psychology of decision making Among the themes uniting all of these studies is that there are patterns in the processes leading to interstate wars that these patterns are complex and that an understanding of war requires rigorous theory and that a key prerequisite of theory is conceptual clarity The focus is on theoretical essays on war and on decision making in security policy These essays involve the critique and reconceptualization

of major theories of war For each theory the author engages in the conceptual clarification of key variables the identification of the varied causal paths through which each shapes decisions for war and peace the analytical limitations of the theory and the methodological hurdles confronting valid empirical tests of the theory The volume begins with a substantial introductory chapter Each subsequent chapter begins with a brief introduction and ends with an annotated bibliographic note that identifies important subsequent work on the topic and includes a complete set of references The chapters are organized by a levels of analysis framework It begins with four chapters focusing on power dynamics at the systemic or dyadic levels including balance of power theory power transition theory theories of preventive war and offense defense theory It then turns to the diversionary theory of war a leading societal level theory focusing on domestic incentives for adventurous foreign policies Next are three studies focusing on individual level psychological sources of security policy including misperception learning and risk propensity in the form of prospect theory The concluding chapter attempts to survey the current state of the art in the study of the causes of interstate war and identifies some of the major unanswered questions and suggests a number of fruitful paths for future research This book will be of much interest to students of the causes of war quantitative methods war and conflict studies international relations and security studies

Causes of War Stephen Van Evera, 2001-03-15 What causes war How can military conflicts best be prevented In this book Stephen Van Evera frames five conditions that increase the risk of interstate war false optimism about the likely outcome of a war a first strike advantage fluctuation in the relative power of states circumstances that allow nations to parlay one conquest into another and circumstances that make conquest easy According to Van Evera all but one of these conditions false optimism rarely occur today but policymakers often erroneously believe in their existence He argues that these misperceptions are responsible for many modern wars and explores both World Wars the Korean War and the 1967 Mideast War as test cases Finally he assesses the possibility of nuclear war by applying all five hypotheses to its potential onset Van Evera's book demonstrates that ideas from the Realist paradigm can offer strong explanations for international conflict and valuable prescriptions for its control

The Causes of War David Sobek, 2013-04-25 Wars often spring out of nowhere with little warning One need only look at the recent troubles at the Lebanon Israeli border for evidence of this claim At other points in history such as the run up to the Second World War wars seem all but foretold How does one understand a phenomenon that at times seems so random while at others so predictable Is there an underlying cause of war and if so what is it In this book David Sobek argues that there is no single explanation for war factors leading to war in one case may well lead to peace in another Understanding the onset of war he contends requires a movement away from single theories towards one that embraces the multi faceted causes of war The characteristics of individual states the strategic interaction of multiple states and the broad structure of the international system all affect the risk of war Throughout the book Sobek draws on a wide

range of examples from the rise of Japan in the 19th century to the emergence of Hamas in the 21st century to show how both domestic and international politics push states to or pull them from the brink of armed conflict While civil war and terrorism are often viewed as a form of violence distinct from interstate war Sobek examines them as simply an extreme form of asymmetric warfare From this perspective terrorism emerges as just another tactic used by actors engaged in armed conflict The Causes of War will be essential reading for students of security and strategic studies as well as anyone seeking to understand the rise of violent conflict in the contemporary world

War and Its Causes Jeremy Black, 2019 This interdisciplinary book assesses the causes of war considering what war actually is key for understanding its causes Black marshals global examples from the fifteenth century to the present analyzing the three main types of war between cultures within cultures and civil emphasizing the social and cultural factors leading to conflict

The Causes of War Alexander Gillespie, 2020 This is the fourth volume of a projected six volume series charting the causes of war from 3000 BCE to the present day written by a leading international lawyer and using as its principal materials the documentary history of international law largely in the form of treaties and the negotiations which led up to them These volumes seek to show why millions of people over thousands of years slew each other In departing from the various theories put forward by historians anthropologists and psychologists the author offers a different taxonomy of the causes of war focusing on the broader settings of politics religion migrations and empire building These four contexts were dominant and often overlapping justifications during the first four thousand years of human civilisation for which written records exist
