**Object Relations in Severe Trauma** Stephen Prior,2004 Building upon the theoretical work of Ferenczi Fairbairn and Berliner the author describes four basic relational patterns in the lives of abused children the reliving of abusive relationships either as victim or as perpetrator identification with the aggressor masochistic self blame and the seeking of object contact through sex or violence The interweaving of these patterns creates what Dr Prior calls relational dilemmas According to him these four basic relational patterns are held in place by the child s profound fear of falling into primitive states of unrelatedness and consequent annihilation anxiety For example the abused child believes that victimization by or identification with the bad object no matter how horrible that may be is preferable to the psychic disintegration that complete nonrelatedness creates Dilemmas of this nature tear apart the child s psyche leading to unstable and tormented models of self other and relationship Object Relations in Severe Trauma provides sensitive understanding of childhood traumatization and a conceptual and technical framework for the treatment of patients both children and adults who have suffered from it

long term therapy for it takes the patience of waiting and wondering to recover deeply repressed memories explore them thoroughly and evaluate their meaning and importance for the patient The Scharffs demonstration of clinical processes helps therapists contain their own countertransference to trauma so as to be fully present with their clients and consistently able to confront abuse patterns in society The object relations approach not only deals with trauma's impact on the individual but views it in its cultural and interpersonal context as well Society alternately emphasizes and ignores trauma so that an encapsulated traumatic experience festers until the next eruption just as dissociative defenses segmentally protect and exaggerate traumatic experience in the individual case The Scharffs review Kramer's Mahlerian approach McDougall's insights into the silence of the psyche and the words of the soma and Anzieu's elaboration of the body ego They resuscitate Freud's seduction hypothesis and the traumatic basis of the repetition compulsion They compare and contrast the concepts of
