## **On Philosophy Notes From A Crisis:**

**Intellectuals and the Crisis of Politics in the Interwar Period and Beyond** Balázs Trencsényi, 2025-01-31 This volume offers a broad ranging and comprehensive analysis of the history and theory of the political idea of crisis from the interwar period through to the present day It considers how the multiple crises of civilization capitalism social cohesion liberalism democracy socialism and the nation state were conceptualized how these spheres of crisis became entangled and who the intellectuals politicians and experts were who employed these discourses Intellectuals and the Crisis of Politics in the Interwar Period and Beyond maps the range of meanings the term crisis has borne and the roles it has performed across disciplines and countries de centering the dominant narrative that takes Western European positions and developments as normative It especially focuses on the historical roots of two key contemporary contesters of liberal democracy neoliberalism and populism and presents an innovative analysis of the roots of contemporary illiberalism in Europe Bringing these ideas into the present day Bal zs Trencs nyi offers ideas on how a reflective and self critical liberal democratic political position could be defined and defended in our current predicament which is increasingly compared to the interwar period and is often described as a polycrisis

**The Psychology of Global Crises and Crisis Politics** Irene Strasser, Martin Dege, 2021-11-03 This edited volume brings together some of the most prominent scholars in the fields of theoretical critical and political psychology to examine crisis phenomena The book investigates the role of psychology as a science in times of crisis discusses how socio political change affects the discipline and profession and renders psychological interventions as forms of political action The authors examine how notions of crisis and the interpretation of crisis scenarios are heavily intertwined with governmental and state interests Seeking to disentangle individual subjectivity subjectification and science as forms of politics the volume works toward an explicit goal to decolonize psychology The chapters elaborate on the importance of the psychological sciences in times of crisis and the role of psychologists as practitioners Ultimately the diverse contributions underline the connection of scientific theory practice and politics Interdisciplinary in scope and wide ranging in its perspectives this timely work will appeal to students and scholars of theoretical and political psychology critical psychology and cultural studies

**Islamic Philosophy and Occidental Phenomenology on the Perennial Issue of Microcosm and Macrocosm** Anna-Teresa Tymieniecka, 2006-09-22 By proposing the Microcosm and Macrocosm analogy for dialogue between Islamic Philosophy and Occidental Phenomenology the authors of this volume are reviving the perennial positioning of the human condition in the play of forces within and without the human being This theme has run from Plato through the Middle Ages Renaissance and Modernity and has been ignored by contemporaries It now acquires a new pertinence and striking significance due to the scientific discoveries into the infinitely small in life on the one hand and the prodigious technological discoveries of the infinitely great on the other Both open up undreamt of prospects for the continuing conquest of cosmic forces The human person thrown into turmoil by the new approaches to life and needing to acquire new habits of

mind having lost security of all beliefs desperately seeks a new clarification of the Human Condition within the unity of everything there is of cosmic forces and of his destiny The dialogue between Islamic Philosophy and phenomenology of life can show the way Papers by Gholam Reza A awani Mehdi Aminrazavi Roza Davari Ardakani Mohammad Azadpur Gary Backhaus Marina Banchetti Robino William Chittick Seyed Mostafa Muhaghghegh Damad Golamhossein Ebrahimi Dinani Nader El Bizri Kathleen Haney Salahaddin Khalilov Sayyid Mohammad Khamenei Mahmoud Khatami Mieczyslaw Pawel Migon Nikolay Milkov Sachiko Murata Anna Teresa Tymieniecka Daniela Verducci      **On Philosophy** John McCumber, 2013-01-09 Deepening divisions separate today s philosophers first from the culture at large then from each other and finally from philosophy itself Though these divisions tend to coalesce publicly as debates over the Enlightenment their roots lie much deeper Overcoming them thus requires a confrontation with the whole of Western philosophy Only when we uncover the strange heritage of Aristotle s metaphysics as reworked for example by Descartes and Kant can we understand contemporary philosophy s inability to dialogue with women people of color LGBTs and other minority groups Only when we have understood that inability can we see how the thought of Hegel and Heidegger contains the seeds of a remedy And only when armed with such a remedy can philosophy rise to the challenges posed by thinkers such as David Foster Wallace and Abraham Lincoln The book s interpretations of these figures and others past and present are as scrupulous as its conclusions will be controversial The result contributes to the most important question confronting us today does reason itself have a future      **Husserl, Heidegger and the Crisis of Philosophical Responsibility** R. Philip Buckley, 1992 This volume sheds light upon the omnipresent discussion of crisis in our times by returning to the thought of the two philosophers upon which much of this talk is consciously or unconsciously based namely Edmund Husserl and Martin Heidegger By tracing the narrative of the crisis from Husserl s early treatment of arithmetic and logic through to Heidegger s meditations on the essence of technology the author not only proposes a unified reading of both Husserl s and Heidegger s work but points to important elements of the often underplayed continuity between these phenomenologists At the same time the concept of crisis also illustrates the difference between Husserl and Heidegger Though both define the crisis as one of forgetting and both view this forgetting as a matter of philosophical responsibility essential divergence emerges in their interpretation of this phenomenon Three questions uncover these points of convergence and divergence First does not the forgetfulness reveal itself as a type of *felix culpa* a necessary decay that now reveals itself in a positive light indeed as the precondition of history itself      *Philosophical Letters of David K. Lewis* David Kellogg Lewis, 2020 The life long correspondence of David K Lewis one of the most influential philosophers of the twentieth century reveals the development breadth and depth of his philosophy in its historical context The second of this two volume collection focuses on his contributions to philosophical questions of language mind and epistemology      *The Physicist and the Philosopher* Jimena Canales, 2016-10-04 The explosive debate that transformed our views about time and scientific truth On April 6 1922 in Paris Albert Einstein and

Henri Bergson publicly debated the nature of time Einstein considered Bergson's theory of time to be a soft psychological notion irreconcilable with the quantitative realities of physics Bergson who gained fame as a philosopher by arguing that time should not be understood exclusively through the lens of science criticized Einstein's theory of time for being a metaphysics grafted on to science one that ignored the intuitive aspects of time *The Physicist and the Philosopher* tells the remarkable story of how this explosive debate transformed our understanding of time and drove a rift between science and the humanities that persists today Jimena Canales introduces readers to the revolutionary ideas of Einstein and Bergson describes how they dramatically collided in Paris and traces how this clash of worldviews reverberated across the twentieth century She shows how it provoked responses from figures such as Bertrand Russell and Martin Heidegger and carried repercussions for American pragmatism logical positivism phenomenology and quantum mechanics Canales explains how the new technologies of the period such as wristwatches radio and film helped to shape people's conceptions of time and further polarized the public debate She also discusses how Bergson and Einstein toward the end of their lives each reflected on his rival's legacy Bergson during the Nazi occupation of Paris and Einstein in the context of the first hydrogen bomb explosion *The Physicist and the Philosopher* is a magisterial and revealing account that shows how scientific truth was placed on trial in a divided century marked by a new sense of time

**Sociology, Ethnomethodology and Experience** Mary F.

Rogers,1983-11-25 In this volume first published in 1983 Professor Rogers examines the usefulness of a phenomenological approach to sociology Her broad purpose is to demonstrate the theoretical and methodological advantages phenomenological sociology holds Thus she offers a selective introductory exposition of phenomenology highlighting its relevance for social scientists and undercutting the notion of phenomenology as a non scientific subjective or esoteric method of study

**Consciencism in African Political Philosophy** Chuba Okadiigbo,1985 **A Protest Against Agnosticism: the Rationale Or Philosophy of Belief** Penelope-F ..... Fitzgerald,1890 **Notes and Queries** ,1879 **The Institution of Philosophy** Avner Cohen,Marcelo Dascal,1989 Book jacket From postmodernist and post philosophical quarters we now hear that philosophy is at the end of its rope that modern philosophy is just another modernist product which has outlived its usefulness Whatever the precise merits of the various postmodernist critiques they have certainly compelled many philosophers to take notice and to concede that their enterprise has reached an impasse The essays in this volume mark a new stage in the debate Though divergent in their philosophical or post philosophical standpoints the authors all share the view that philosophy is at a fateful juncture Postmodernism pragmatism feminism and historicism are some of the tendencies scrutinized in this wide ranging symposium on the past present and many possible futures of the institution of philosophy

**Bookseller and the Stationery Trades' Journal** ,1882      The Dialectics of Liquidity Crisis Chris Jefferis,2017-02-17

This book analyses the logic of applying the American Post Keynesian economist Hyman Minsky's Financial Instability Hypothesis FIH to the financial crisis of 2007-08. Arguing that most theories of financial crisis including Minsky's own only describe events but do not actually explain them, the book surveys theories of financial crisis that have been developed to describe instability in the post WW2 US financial system and analyses them in their historical context. The book argues that explanation of the financial crisis of 2007-08 should involve interpretation of the concept of risk which guides the construction and pricing of contemporary financial products such as derivatives and asset backed securities as a form of liquidity, the concept that Minsky sought to explain the financial crises of the 1970s and 1980s with. The book highlights the continuing relevance of Minsky's theory of liquidity crisis as immanent in a historical sense to the products and trading practices of modern finance because these products were developed to obviate the crisis dynamics that Minsky described. Minsky's FIH can therefore inform historical understanding of the crisis of 2007-08 but is not directly explanatory itself. The book explores explanation of the financial crisis of 2007-08 interpreting liquidity in practical historical terms as involving a process of development out of prior crisis dynamics. Seeking to contribute to debates over the causes of the financial crisis of 2007-08 by blending a discussion of historicizing philosophy, economic theory and contemporary financial banking and trading practices, this work will be of great interest to scholars of international political economy, heterodox economics and critical theory.
