Vehicle Electrification in Modern Power Grids Vitor Monteiro, João L. Afonso, Sheldon Williamson, 2024-07-13 Vehicle Electrification in Modern Power Grids Disruptive Perspectives on Power Electronics Technology and Control Challenges collects the newest advances in technology for electric vehicle integration into one practical volume for professionals and advanced researchers The book not only summarizes and clarifies legislation and grid codes for the area but also outlines the modeling and analytical techniques needed including predicting power converter reliability and its remaining useful life Specializing in microgrid clusters the book provides advanced power electronics device technology from wide band gap WBG to DSP based digital control platforms and new materials for passive filters Blending cutting edge research and practical technology this book provides a centralized resource for advanced researchers and engineers looking to accelerate vehicle electrification in the power grid Reveals new disruptive power electronics and modeling technologies to enable EV integration into the grid Collects guidance on mechanisms for digital control for EV charging and modes of operation from V2G to G2H Provides legislation and grid codes needed by engineers working on vehicle electrification in power grids

Sustainable IoT and Data Analytics Enabled Machine Learning Techniques and Applications V. Ajantha Devi, 2024-09-27 This book provides a structured presentation of machine learning related to vision speech and natural language processing It addresses the tools techniques and challenges of machine learning algorithm implementation computation time and the complexity of reasoning and modeling of different types of data The book covers diverse topics such as semantic image segmentation deep visual residual abstraction brain computer interfaces natural language processing traffic and signaling driverless driving and radiology The majority of smart applications have a need for a sustainable Internet of things IoT and artificial intelligence Active research trends and future directions of machine learning under big data analytics are also discussed Machine learning is a class of artificial neural networks that have become dominant in various computer vision tasks attracting interest across a variety of domains as they are a type of deep neural networks efficient in extracting meaningful information from visual imagery

Lonely Planet British Columbia & the Canadian Rockies Lonely Planet, *Analyzing the Range Barrier to Electric Vehicle Adoption* Matthias Eisel, 2016-11-01 Although electric vehicles EVs are theoretically capable of emissions free driving their market penetration is still pending which is reflected in their low sales numbers This is mainly due to three major barriers to the widespread adoption of these vehicles with one of them being their limited average driving distance Although the limited range of these cars would theoretically be sufficient to match the usage patterns of most drivers they are generally unwilling to accept it In this regard users often report serious concerns about not reaching their planned destinations due to battery depletion which is commonly referred to as range anxiety Within this cumulative dissertation four research questions were derived aiming to

investigate measures that mitigate range anxiety and thus positively affect the attitude toward using EVs To answer these research questions six studies were conducted The insights gained from analyzing the data provide researchers with an in depth knowledge for investigating the influence of information systems on range anxiety In addition practitioners find decision support for addressing the phenomenon of range anxiety in implementing and designing information systems
