Visualizing with Text uncovers the rich palette of text elements usable in visualizations, from simple labels through to documents. Using a multidisciplinary research effort spanning across fields including visualization, typography, and cartography, it builds a solid foundation for the design space of text in visualization. The book illustrates many new kinds of visualizations, including

microtext lines skim formatting and typographic sets that solve some of the shortcomings of well known visualization techniques

Key features

- More than 240 illustrations to aid inspiration of new visualizations
- Eight new approaches to data visualization leveraging text
- Quick reference guide for visualization with text
- Builds a solid foundation extending current visualization theory
- Bridges between visualization typography text analytics and natural language processing
