*Organisational Change Management for Sustainability* Rodrigo Lozano, 2024-05-23. This book is aimed at providing clarity through a systemic and systematic approach to organisational change management for sustainability. Chapter 2 provides an overview of sustainable development and sustainability discourses focussing on the economic, environmental, social, and time dimensions as well as their interactions. Chapter 3 explains what organisations are, the types of organisations (civil society, corporations, education, public sector, and hybrid), the levels and system elements (individuals, groups, organisation and system), attitudes (informational, emotional, and behavioural), the stakeholders that affect and are affected by the organisation, and the interactions between organisations (from competition to collaboration). Chapter 4 focuses on how organisations have been addressing sustainability, divided into 1) efforts to contribute to sustainability (i.e. focussing outside the organisation) and 2) engagement efforts (i.e. those focussing inside the organisation) e.g. through the use of tools, initiatives, and approaches for sustainability and collaboration. Chapter 5 discusses change types (internal vs. external, proactive vs. reactive, etc.), change strategies, change frameworks, and change for sustainability in organisations. Chapter 6 focusses on three key mechanisms for sustainability: Leadership, Governance, and Assessment and reporting, with examples from Higher Education Institutions, corporations, and public sector organisations. Chapter 7 discusses the different drivers (internal, connecting, and external) that foster sustainability in organisations. Examples from empirical research are presented. Chapter 8 delves into resistance to change, particularly on the barriers that slow down or stop sustainability in organisations, as well as the strategies to overcome the barriers to change. Examples from empirical research are presented. The seventh chapter focuses on the different strategies that help reduce or eliminate resistance to sustainability in organisations. Examples from empirical research are presented. Chapter 9 focusses on where sustainability efforts have started (incorporation) and how they have been adopted throughout the organisation (institutionalisation). Examples from empirical research are presented. Chapter 10 presents the effects of external stimuli such as COVID-19 on organisational change management for sustainability.

**Organisational Change & Development** Rica Viljoen, 2015. Organisational Change Development (OCD) is designed to capture leading edge thinking about OCD in organisations as it merges with traditional African wisdom. It manifests in issues that differ from organisational effectiveness efforts to a highly individualised craft of catalyst practitioner. In an attempt to provide a solid conceptualisation of the field of study, a framework of inclusivity that can be followed (case studies and OCD methodologies) this book strives to combine some of the practices into reality. The book concludes with a chapter that studies international trends in organisational change and development. The assumptions of the evolving field of consulting psychology are incorporated. The multi-cultural nature of the new world of work and the increasingly diverse settings of organisations of the future ask for higher levels of complexity.
