Organization And Organizing Materiality Agency And Discourse:

Organization and Organizing Daniel Robichaud, Francois Cooren, 2013-05-02 Recipient of the 2013 Top Edited Book Award by the Organizational Communication Division of the National Communication Association USA This timely collection addresses central issues in organizational communication theory on the nature of organizing and organization The unique strength of this volume is its contribution to the conception of materiality agency and discourse in current theorizing and research on the constitution of organizations It addresses such questions as To what extent should the materiality of texts and artifacts be accounted for in a process view of organization What part does materiality play in the process by which organizations achieve continuity in time and space In what sense do artifacts perform a role in human communication and interaction and in the constitution of organization What are the voices and entities participating in the emergence and stabilization of organizational reality The work represents scholarship going on in various parts of the world and features contributions that overcome traditional conceptions of the nature of organizing by addressing in specific ways the difficult issues of the performative character of agency materiality as the basis of the iterability of communication and continuity of organizations and discourse as both textuality and interaction The contributions laid out in this book also pay tribute to the work of the organizational communication theorist James R Taylor who developed a view of organization as deeply rooted in communication and language Contributors extend and challenge Taylor's communicative view by tackling issues and assumptions left implicit in his work

The Situated Organization James R. Taylor, Elizabeth J. Van Every, 2010-09-13 *The Situated Organization* explores recent research in organizational communication emphasizing the organization as constructed in and emerging out of communication practices. Working from the tradition of the Montreal School in its approach it focuses not only on how an organization's members understand the purposes of the organization through communication but also on how they realize and recognize the organization itself as they work within it. The text breaks through with an alternative viewpoint to the currently popular idea of organization as network viewing organization instead as a configuration of agencies and their fields of practice. It serves as an original comprehensive and well written text elaborated by case studies that make the theory come to life. The substantial ideas and insights are presented in a deep and meaningful way while remaining comprehensible for student readers. This text has been developed for students at all levels of study in organizational communication who need a systematic introduction to conducting empirical field research. It will serve as an invaluable sourcebook in planning and conducting research.

Verbal Communication Andrea Rocci, Louis de Saussure, 2016-03-07 Common sense tells us that verbal communication should be a central concern both for the study of communication and for the study of language. Language is the most pervasive means of communication in human societies especially if we consider the huge gamut of communication phenomena where spoken and written language combines with other modalities such as gestures or pictures. Most communication researchers have to deal with issues of language use in their work. Classic methods in communication research from content analysis to interviews and questionnaires not to mention the obvious cases of rhetorical analysis and discourse analysis presuppose the understanding of the meaning of spontaneous or elicited verbal productions. Despite its pervasiveness verbal communication does not currently define one cohesive and distinct subfield within the communication discipline. The Handbook of Verbal Communication seeks to address this gap. In doing so it draws not only on the communication discipline but also on the rich interdisciplinary research on language and communication that developed over the last fifty years as linguistics interacted with the social sciences and the cognitive sciences. The interaction of linguistic research with the social sciences has

produced a plethora of approaches to the study of meanings in social context from conversation analysis to critical discourse analysis while cognitive research on verbal communication carried out in cognitive pragmatics as well as in cognitive linguistics has offered insights into the interaction between language inference and persuasion and into cognitive processes such as framing or metaphorical mapping The Handbook of Verbal Communication volume takes into account these two traditions selecting those issues and themes that are most relevant for communication scholars It addresses background matters such as the evolution of human verbal communication and the relationship between verbal and non verbal means of communication and offers an extensive discussion of the explicit and implicit meanings of verbal messages with a focus on emotive and figurative meanings Conversation and fundamental types of discourse such as argument and narrative are presented in depth as is the key notion of discourse genre The nature of writing systems as well as the interaction of spoken or written language with non verbal modalities are devoted ample attention Different contexts of language use are considered from the mass media and the new media to the organizational contexts Cultural and linguistic diversity is addressed with a focus on phenomena such as multilingual communication and translation A key feature of the volume is the coverage of verbal communication quality Quality is examined both from a cognitive and from a social perspective It covers topics that range from to the cognitive processes underlying deceptive communication to the methods that can be used to assess the quality of texts in an organizational context

Rhetoric and Resistance in the Corporate Academy Christopher Carter,2008 Rhetoric and Resistance in the Corporate Academy analyzes the political and legal

struggles between labor movements and school administrators over the rise of part time and temporary jobs in higher education Focusing particular attention on the labor of writing instruction Carter finds among literacy workers both a deeply exploited segment of the campus population and a vector of resistance to the hegemony of flexible hiring Contrary to visions of ivory tower seclusion he traces continuities between teachers and students experiences as corporate employees contending that their frequently insecure positions inadequate working conditions minimal benefits and marginalized voices constitute grounds for political alliance Carter then outlines a labor theory of agency that entails long range collaboration among tenure line faculty part time and non tenure track teachers and student social movements listening always for harmonies as well as dissonances among their modes of argument

Discursivity, Relationality and Materiality in the Life of the Organisation Colleen E. Mills,Francois Cooren,2019-10-23 The field of organisational communication has been rapidly transforming in the wake of the linguistic and discursive turns that have been sweeping across the social sciences

since the mid eighties These turns have prompted organisational communication scholars to look more closely at how they think about communication and its relationship to the organisation and the process of organizing What has emerged from these reflections is a perspective that proposes communication is not merely something that happens in organisations but is the heart of organizing and therefore actually constitutes the organisation This perspective which embraces several sub threads is now commonly referred to as the CCO Communication as Constitutive of Organisation perspective This is itself evolving as scholars come to realize that organizing does not just occur at the discursive level It is inextricably coupled to the material and relational aspects of work the discourse mutually constitutes relationships between human and non human bodies that combine to create what we encounter when we participate in organisational life This book examines the way these three dimensions combine to create organisational outcomes In doing so it advances CCO and sociomateriality scholarship and contributes to new ways of thinking about strategy and practice The series of empirical studies should interest the widely interdisciplinary audience that seeks to understand work organizing and management This book was originally published as a special issue of the Communication Research and Practice journal *Materiality and Organizing*

Paul M. Leonardi, Bonnie A. Nardi, Jannis Kallinikos, 2012-11-22 Ask a person on the street whether new technologies bring about important social change and you are likely to hear a resounding yes But the answer is less definitive amongst academics who study technology and social practice Scholarly writing has been heavily influenced by the ideology of technological determinism the belief that some types of technologically driven social changes are inevitable and cannot be stopped Rather than argue for or against notions of determinism the authors in this book ask how the materiality the arrangement of physical digital or rhetorical materials into particular forms that endure across differences in place and time of technologies ranging from computer simulation tools and social media to ranking devices and rumours is actually implicated in the process of formal and informal organizing The book builds a new theoretical framework to consider the important socio technical changes confronting people's everyday experiences in and outside of work Leading scholars in the field contribute original chapters examining the complex interactions between technology and the social between artefact and humans The discussion spans multiple disciplines including management information systems informatics communication sociology and the history of technology and opens up a new area of research regarding the relationship between materiality and organizing

Schooling as a Ritual Performance Peter McLaren, 1999-08-12 In this third edition Peter McLaren engages with some of the latest anthropological thinking and presents the reader with a powerful manifesto for critical ethnography in the 21st century **Abstracts of the Annual Meeting -- American Anthropological Association** American Anthropological Association, 2003 The Agency of Organizing Boris H. J. M. Brummans, 2017-09-13 Winner of the 2018 Outstanding Edited Book Award from the Organizational Communication Division of the National Communication Association The Agency of Organizing explains why the notion of agency is central to understanding what

organizations are how they come into existence continue to exist or fade away and how they function Written by leading organizational communication scholars the chapters in this edited volume present seven different theoretical perspectives on agency in the dynamics of organizing Authors discuss how they conceptualize agency from their own perspective and how they propose to investigate agency empirically in processes of organizing by using specific methods Through insightful case studies they demonstrate the value of these perspectives for organizational research and practice **(No) Memory** Jorinde Seijdel,2004 How can cultural heritage be made accessible without resisting new developments or turning city and countryside into a museum What is the impact of the media and digital storage techniques on the social and historic process of remembrance And what is the role of art in all this Here leading authors artists architects and theorists answer these and other questions through numerous essays some photographic book reviews and project documentation of works that address issues of progress and remembrance

Providing an overview of domains such as study methodologies and perspectives used in research this text shows how discourse analysis has moved beyond its roots in literary theory to become an important approach in the study of organizations **The United States Law Week** ,1950 **Materiality and Space** Nathalie Mitev,Francois-Xavier de Vaujany,2013-08-09 Materiality and Space focuses on how organizations and managing are bound with the material forms and spaces through which humans act and interact at work It concentrates on organizational practices and pulls together three separate domains that are rarely looked at together sociomateriality sociology of space and social studies of technology The contributions draw on and combine several of these domains and propose analyses of spaces and materiality in a range of organizational practices such as collaborative workspaces media work urban management e learning environments managerial control mobile lives institutional routines and professional identity Theoretical insights are also developed by Pickering on the material world Lyytinen on affordance Lorino on architexture and Intronà on sociomaterial assemblages in order to delve further into conceptualizing materiality in organizations

Alternative Press Index ,1997 **Communicating and Organizing in Context** Beth Bonniwell Haslett,2013-06-17 Communicating and Organizing in Context integrates Giddens structuration theory with Goffman's interaction order and develops a new theoretical base the theory of structuration interaction for the analysis of communicating and organizing Both theorists emphasize tacit knowledge social routines context social practices materiality frames agency and view communication as constitutive of social life and of organizing Thus their integration in structuration interaction provides a coherent communication centric approach to analyzing communicating organizing and their interrelationships This book will be a valuable resource for students and scholars as an orientation to the field of organizational communication and as an integration of organizing and communicating It will also be useful for practitioners as a tool for understanding how conceptual frames limit possibilities and constitute the nature of organizing and members participation in organizations
