Development in Public Administration Maurizio Decastri, Stefano Battini, Filomena Buonocore, Francesca Gagliarducci, 2020-08-26 Cultural economic and political trends are changing the way public administrations are organized and this book examines the new challenges managers face with the need for a shift from a traditional bureaucratic model to a competency based approach to organizational design and management in the areas of recruitment training career development and assessment Through the analysis of an experimental project launched jointly by the Italian National School for Administration SNA and the Prime Minister's Office this book showcases how a competency based system can be a key tool in reforming HR in the public sector with significant effects on the organization and management of public administration **Organizational Assessment and Improvement in the Public Sector** Kathleen M.

Immordino, 2009-10-13 Calls for performance measures and metrics sound good but public sector organizations often lack the tools required to assess the organization as a whole and create true change In order to implement an integrated cycle of assessment planning and improvement government agencies at all levels need a usable framework for organizational assessment that speaks to their unique needs Organizational Assessment and Improvement in the Public Sector provides that framework an understanding of assessment itself and a methodology for assessment focused on the public sector The book introduces the concept of organizational assessment its importance and its significance in public sector organizations It addresses the organizational theory that underlies assessment including change management organizational and individual learning and organizational development Building on this the author focuses on the processes and demonstrates how the

communication that results from an assessment process can create a widely accepted case for change She presents a model grounded in the Malcolm Baldrige National Quality Program criteria but adapted for the culture of government organizations She also addresses the criteria that form the basis for assessment and implementation and provides examples and best practices Facing decreasing budgets and an increasing demand for services government agencies must increase their capabilities maximize their available fiscal and human resources and increase their effectiveness and efficiency They often operate in an atmosphere that prizes effectiveness but measures it in silos assigned to individual programs and a structure that encourages people to do more with less while systematically discouraging efficiency Stressing the significant and important differences between a business and a government this book supplies the knowledge and tools necessary to create a culture of assessment in government organizations at all levels
