Malik, 2011-04-18 This book provides a comprehensive treatment of electric distribution systems Few books cover specific topics in more depth and there is hardly any book that deals with the key topics of interest to distribution system engineers The book introduces these topics from two points of view 1 The practical point of view by providing practical examples and the problems which can be solved 2 The academic point of view where the analysis and various techniques used for distribution system planning are explained The most outstanding feature of this book is a combination of practical and academic explanation of its contents Another outstanding feature is a collection of the traditional and current topics of distribution systems condensed into one book The reader will gain an understanding of distribution systems from both practical and academic aspects will be able to outline and design a distribution system for specific loads cities zones etc Readers will also be able to recognize the problems which may occur during the operation of distribution systems and be able to propose solutions for these problems **Robot Intelligence Technology and Applications 2012** Jong-Hwan Kim, Eric T Matson, Hyun Myung, Peter Xu, 2013-04-03 In

recent years robots have been built based on cognitive architecture which has been developed to model human cognitive ability. The cognitive architecture can be a basis for intelligence technology to generate robot intelligence. In this edited book the robot intelligence is classified into six categories: cognitive intelligence, social intelligence, behavioral intelligence, ambient intelligence, collective intelligence, and genetic intelligence. This classification categorizes the intelligence of robots based on the different aspects of awareness and the ability to act deliberately as a result of such awareness. This book aims at serving researchers and practitioners with a timely dissemination of the recent progress on robot intelligence technology and its applications based on a collection of papers presented at the 1st International Conference on Robot Intelligence Technology and Applications RiTA held in Gwangju, Korea, December 16-18, 2012. For a better readability, this edition has the total 101 papers grouped into 3 chapters: Chapter I Cognitive Intelligence, Social Intelligence, and Behavioral Intelligence; Chapter II Ambient Intelligence, Collective Intelligence, and Genetic Intelligence; Chapter III Intelligent Robot Technologies and Applications.
