In this sense it reflects the editors' concern to provide material with practical tips but theoretically grounded and truly useful to professionals in clinical and also school contexts. This first volume is divided into two parts. The first addresses the theoretical and practical foundations of child neuropsychological assessment and intervention. Neuropsychological assessment is discussed with a focus on its role in guiding intervention. Also different types of interventions are presented and a taxonomy is offered according to its differential objectives of promotion or remediation and the target population: typical development, functional or structural alterations of the Nervous System leading to the suggestion of three types of interventions in neuropsychology in both clinical and school contexts: 1 Early preventive Intervention, 2 Habilitation, and 3 Rehabilitation. Cognitive stimulation in different contexts such as school, family and clinical is also discussed, exploring how teachers and parents can also collaborate in intervention processes, expanding the possibilities for action beyond the clinical context. A section concludes by addressing the importance of the feedback and the neuropsychological assessment report. The second part focuses specifically on stimulation and rehabilitation, offering chapters that target specific skills such as attention, memory, executive functions and academic skills among others. The chapters summarize evidence, bring tips and illustrate existing materials and programs in a continuous articulation between theory, evidence, practice. Originally published in Portuguese and now available in English, *Neuropsychological Interventions for Children* Volumes 1 and 2 will be of interest to professionals working with neuropsychology in clinical and school contexts. It will also be useful in neuropsychology teaching contexts, specialization courses in neuropsychology and related areas and for students and professionals in interface areas such as Psychology, Education, Speech Therapy, Occupational Therapy among others.
