Machine Learning Upgrade Kristen Kehrer, Caleb Kaiser, 2024-07-29. A much-needed guide to implementing new technology in workspaces. From experts in the field comes *Machine Learning Upgrade: A Data Scientist's Guide to MLOps, LLMs, and ML Infrastructure*, a book that provides data scientists and managers with best practices at the intersection of management, large language models, LLMs, machine learning, and data science. This groundbreaking book will change the way that you view the pipeline of data science. The authors provide an introduction to modern machine learning, showing you how it can be viewed as a holistic end-to-end system, not just a shiny new gadget in an otherwise unchanged operational structure. By adopting a data-centric view of the world, you can begin to see unstructured data and LLMs as the foundation upon which you can build countless applications and business solutions. This book explores a whole world of decision making that hasn't been codified yet, enabling you to forge the future using emerging best practices. Gain an understanding of the intersection between large language models and unstructured data. Follow the process of building an LLM-powered application while leveraging MLOps techniques such as data versioning and experiment tracking. Discover best practices for training, fine-tuning, and evaluating LLMs. Integrate LLM applications within larger systems, monitor their performance, and retrain them on new data. This book is indispensable for data professionals and business leaders looking to understand LLMs and the entire data science pipeline.

Automotive News, 2007 The New York Times Index, 2008 *The transHuman Code* Carlos Moreira, David Fergusson, 2019-06-04. A Humanitarian Approach to a Technologically Innovative Future. In *The transHuman Code*, authors Carlos Moreira and David Fergusson ask: Are we building a better future for humanity with the help of magnificent technology, or are we instead building a better future of better technology at the expense of humanity? We must learn to put humanity first instead of getting caught up in the promise of technological advancement. Humans have been able to adapt, morph, and compromise in every situation we have faced over the centuries and have been able to maintain dominance. We must approach the promises of technology with the same adaptability. What the authors propose is that if we start the design of the transHuman future from a human perspective, making sure that technology will inspire revolution or evolution, then we can ensure humanity continues to thrive. *The transHuman Code* tries to center humanity in the emerging tension between a human-controlled or a machine-controlled world. Moreira and Fergusson examine how humans can maintain the uniqueness and the humanity in this brave new world.
