Big Idea 1: The Practice of Science

- A. Scientific inquiry is a multifaceted activity. The processes of science include the formulation of scientifically investigateable questions, construction of investigations into those questions, the collection of appropriate data, the evaluation of the meaning of those data, and the communication of this evaluation.
- B. The processes of science frequently do not correspond to the traditional portrayal of "the scientific method."
- C. Scientific argumentation is a necessary part of scientific inquiry and plays an important role in the generation and validation of scientific knowledge.
- D. Scientific knowledge is based on observation and inference; it is important to recognize that these are very different things. Not only does science require creativity in its methods and processes, but also in its questions and explanations.

Big Idea 1 benchmarks should be **introduced** during the first nine weeks, and then **embedded** in all science lessons throughout the year as they blend easily with teaching inquiry and are the basis of an activity/lab-based science curriculum.
