The video game console that you choose to play video games on as a heroic character will also have bearing on affecting the value of your future video game collection. The types of video game consoles that people can play video games on as a heroic character are not limited to home video game consoles. The types of video game consoles that people can play video games on as a heroic character encompass handheld video game consoles, home video game consoles, and hybrid video game consoles. The least common type of video game console is a hybrid video game console. A hybrid console allows people to be able to play video games at their abodes and at remote locations that are away from their flat screen televisions. The Nintendo Switch is deemed to be a hybrid video game console primarily because it cannot only be connected to a flat screen television but can also allow people to play video games at remote locations that are away from flat screen televisions due to the Nintendo Switch having a built in screen embedded in it. A hybrid console is able to not only serve as a home video game console but can also double as a handheld video game console which thereby allows it to have tremendous utility as a video game console. A hybrid console is able to appeal to both handheld video game console gamers and home video game console gamers alike. The Nintendo Switch is not the only hybrid video game console. The Nintendo Switch OLED and the Steam Deck are also deemed to be hybrid video game consoles. The Nintendo Switch OLED and the Steam Deck are deemed to be hybrid consoles primarily because they cannot only be connected to a flat screen television but can also allow people to play video games at remote locations that are away from flat screen televisions due to them having a built in screen embedded in them.

**The History of the GPU - New Developments** Jon Peddie, 2023-01-01 This third book in the three part series on the History of the GPU covers the second to sixth eras of the GPU which can be found in anything that has a display or screen. The GPU is now part of supercomputers, PCs, Smartphones and tablets, wearables, game consoles, and handhelds, TVs, and every type of vehicle including boats and planes. In the early 2000s the number of GPU suppliers consolidated to three whereas now the number has expanded to almost 20. In 2022 the GPU market was worth over 250 billion with over 2.2 billion GPUs being sold just in PCs and more than 10 billion in smartphones. Understanding the power and history of these devices is not only a fascinating tale but one that will aid your understanding of some of the developments in consumer electronics, computers, new automobiles, and your fitness watch.
