a content creator of electric car content Electric cars became a global phenomenon amid the 21st century There are a multitude of reasons as to why electric cars became a global phenomenon during the 21st century The reasons as to why electric cars became a global phenomenon amid the 21st century extend beyond the ambit of people being eager to reduce their annual motor oil change costs on their vehicle Another reason as to why electric cars became a global phenomenon during the 21st century is attributable to electric cars being easily accessible to people As of December of 2025 there typically are ample automotive dealerships that sell electric vehicles within a driving distance to a customer's real estate property A customer can typically travel to car dealerships that sell electric vehicles without acquiescing to utilizing an aircraft to do so This is because as of December of 2025 there are an exorbitant amount of car dealerships that sell electric vehicles in the world As of December of 2025 car dealerships that sell electric vehicles as an aggregate are not relegated to being domiciled in a single geographical region Another reason as to why electric cars became a global phenomenon during the 21st century is attributable to an exorbitant amount of people being interested in purchasing an electric car in the pending future For instance a survey discovered that 57% of drivers expect to have an electric vehicle within the next 10 years and only 10% said they would never buy an electric vehicle Meanwhile 23% of survey respondents who do not currently own an electric vehicle said they see themselves buying an electric vehicle within the next five years People are enticed to purchase electric cars Driving an electric vehicle does not deplete motor oil nor gasoline Furthermore driving an electric vehicle does not elicit carbon dioxide emissions nor nitrogen oxide emissions Moreover driving an electric vehicle does not taint the atmosphere with noxious tailpipe emissions Another reason as to why electric cars became a global phenomenon during the 21st century is attributable to operating an electric vehicle bearing a lower per mile energy cost than operating a gasoline powered vehicle Operating an electric vehicle does not deplete motor oil nor gasoline but rather depletes electricity As of August of 2025 it was estimated that electric vehicles reduce per mile energy costs by 50-70% compared to gasoline vehicles In stark contrast to gasoline powered vehicles that are fueled at gas stations electric vehicles can be charged at a person's abode A person also has the autonomy to charge his electric car at an electric vehicle charging station if he forgoes doing so at his abode Another reason as to why electric cars became a global phenomenon during the 21st century is attributable to electric vehicles often being technologically advanced vehicles Technologically advanced electric cars are often significantly more technologically advanced than gasoline powered vehicles An exorbitant amount of technologically advanced electric cars can double as autonomous vehicles since they can have an autopilot feature embedded in them Electric vehicles are inherently faster than gasoline powered vehicles due to their instant torque delivery efficient power transfer advanced battery technology optimized car weight distribution and technological advancements A technologically advanced electric car has more utility than an antiquated gasoline powered car Another reason as to why electric cars became a global phenomenon during the 21st century is attributable to smartphone adoption rates significantly increasing

and broadband internet connection adoption rates increasing amid the 21st century As of December of 2025 most people utilize smartphones and have procured a broadband internet connection People who utilize smartphones and who have procured a broadband internet connection can ascertain information about electric cars with ease on car manufacturer websites car dealership websites and social media platforms Car dealership owners can upload their promotional car dealership videos to their social media channels to entice users of social media platforms to purchase electric cars

This market segment was, according to Kumar, valued at 118 864 5million in 2017 and is expected to reach 567 299 8million by 2025, growing at a compound annual growth rate (CAGR) of 22.3%. Further claims that this rising interest rate is believed to be achieved because of an outperformance in regard to the conventional vehicle, since it provided higher fuel economy, low carbon emission and maintenance convenience of charging at home, smoother drive and reduced sound from engine. This market segment is still in its growing phase, since it must convince people that it will work and is practical. Therefore, the market for all electric vehicles is globally small, at roughly 1% of total sales, but Tesla has been doing its part to double it. In late December 2018, Business Insider 2018 stated that Tesla Inc has created a micro monopoly. Nowadays, according to DeBord, one of the biggest challenges of Tesla is to maintain the electric vehicle (EV) market they have created.
