

Intermittent Fasting

Stage 1: Right After Eating

- Carbohydrates from food are converted into glucose (sugar) and released into the bloodstream.
- Blood sugar level rises.
- Insulin stimulates the conversion of glucose into glycogen as energy storage.

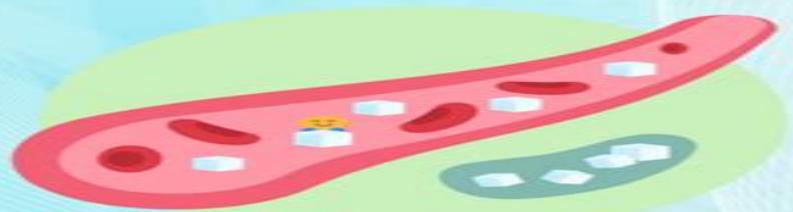

Stage 3: 9 Hours After Eating

- As blood sugar levels continue to drop, the body reacts by converting glycogen back into glucose and releasing it into the bloodstream.
- Fat is not yet used as an energy source, as there is still glucose and glycogen available.

Stage 2: 3 Hours After Eating

- While insulin works, blood sugar level drops.
- In a non-fasting state, glycogen is used as energy.
- Excess glycogen that is not used is stored in the body as fats.

Stage 4: 11 Hours After Eating

- Now that the stored glycogen has been almost used up, a metabolic switch is flipped.
- Fat is burned as it is used as energy.

Stage 5: 14-16 Hours After Eating

- As fat-burning continues, fatty acids are converted into ketones via ketosis.
- Ketones provide energy to the brain, heart and other vital organs.

Injury Report Intermittent Fasting Price:

The Performative Enterprise Alexander Tsigkas, 2021-10-01 This book is about quality redundancy and its replacement by the performativity norm. Performativity is a linguistic social and political mechanism that produces the intended performance. The author Alexander Tsigkas sees this book as a natural continuation of his prior book *The Lean Enterprise*. From the Mass Economy to the Economy of One. He argues that performativity is the flip side of quality on a coin called identity and in postmodernism that is in the age of Industry 4.0 and beyond, companies should be aiming for performativity and achieve quality as one of its many consequences. The author therefore encourages modern businesses to transition from quality orientation as conformance alone to a performance orientation. The author brings forward historic, current, and philosophical perspectives in charting performativity as a new goal for modern businesses. Many examples, case studies, and conceptual constructs are used to drive in the idea of how to create a performative enterprise. [Resources in Education](#), 1992-07

This textbook is designed for undergraduate and graduate psychology and nutrition college courses for students pursuing careers as psychologists, dietitians, nurses, social workers, and a variety of health professionals who want to incorporate nutrition and eating behavior into their discussions with patients.
