comprehensive guide for those looking to understand the practical applications and implications of blockchain and AI in the modern education system Commonwealth Caribbean Business Law Natalie Persadie, Rajendra Ramlogan, 2010-04-20

Commonwealth Caribbean Business Law breaks away from the traditional English approach of treating business law primarily as the law of contract and agency. The book takes a panoramic view of the foundation of various legal systems with a subsequent examination of different areas of legal liability that may affect business activities. These areas include contract law, agency, tort law, criminal law, and internet law as significant challenges confronting the business sector. The book primarily targets the development of business law in several Caribbean Commonwealth jurisdictions but also where appropriate embraces the jurisprudence of other Commonwealth nations such as the United Kingdom, Canada, and Australia. With respect to internet law, the proliferation of judicial pronouncements emerging from the United States provided the platform for the only non-Commonwealth treatment of a topic. The approach of the book is to use excerpts from judgments so as to allow students, particularly the non-legal student, to understand legal principles as espoused by the judiciary without the filtering bias of authors.

Payment Systems and Other Financial Transactions Ronald J. Mann, 1999. If you want to show your students the connection between the UCC, real life, this new systems-oriented casebook provides an ideal vehicle. **PAYMENT SYSTEMS AND OTHER FINANCIAL TRANSACTIONS** uses a series of realistic problems in conjunction with expository text, case excerpts, as well as sample documents/forms to cover the traditional topics of a two-to-three hour payment systems or negotiable instruments course. Placing theory squarely in the context of real life situations, the casebook examines three major systems. Payment Systems examines checks as the paradigm payment system; also explores the many other payment systems for current/future use. Credit Systems analyzes the borrower's obligations, credit enhancement. Systems for Enhancing Liquidity devotes specific attention to negotiability, securitization. Mann draws on his own experience to show what it's like to be a commercial lawyer, using 27 assignments, each designed for a 50 or 75 minute class. Realistic problems that demonstrate the relevance of course material, sample documents/forms that expose students to the actual paperwork used in practice. A thorough Teacher's Manual answers all the problems in the casebook, helps instructors design a syllabus for different course configurations. With coverage of everything from stored value cards to remedies under state law, Mann's **PAYMENT SYSTEMS AND OTHER FINANCIAL TRANSACTIONS** offers both the scope and depth you want.

Commonwealth Caribbean Business Law Rajendra Ramlogan, Natalie Persadie, 2012-05-23. Caribbean Business Law breaks away from the traditional English approach of treating business law primarily as the law of contract and agency. It provides a broad overview of the foundation of various legal systems and goes on to examine the various areas of legal liability that may impact on business activities. These areas include tort law, criminal law, internet law, and payment in business transactions. Specifically, the book targets the development of business law in several Commonwealth jurisdictions, including Canada and Australia, but with special focus on legal developments in Commonwealth Caribbean countries. The

approach of the book is to present excerpts from judgments so as to enable students to understand legal principles as espoused by the judiciary without the filtering bias of authors This new title is essential reading for students taking LLB and Business Degree courses in the Caribbean and other Commonwealth jurisdictions Payment Systems and Other Financial Transactions Ronald J.
