International Aviation, and Treaty Implementation Armand L.C. de Mestral,P. Paul Fitzgerald,Md. Tanveer

Ahmad,2018-09-06 In 1944 the Chicago Convention set out the foundations of public international law regulating international air transport but until 2016 no international agreement existed to limit its environmental impact Sustainable Development International Aviation and Treaty Implementation explains why the CORSIA scheme adopted by the International Civil Aviation Organization in 2016 should be implemented in 2020 even though the adequacy of this scheme is still open to doubt and criticism This book seeks to examine the many dimensions of the effort to contain greenhouse gas emissions from aircraft in a manner consonant with the principles of sustainable development and examines the development of international law and policy in an area that has remained largely outside the general framework of international environmental law International civil aviation is a significant polluter of the atmosphere and in this volume a group of air law and sustainable development law specialists considers how the international community can respond

Civil Liability for Damage Caused by Global Navigation

Satellite System Dejian Kong,2019-05-24 It has come to pass that national security economic growth and transportation safety not to mention such infrastructure as banking and electricity are severely dependent on the positioning information

navigation capabilities and time dissemination provided by Global Navigation Satellite System GNSS However GNSS is not risk free The more humanity depends on GNSS the more risks it has to face It is irresponsible to wait for an accident to happen merely to justify the need for an appropriate GNSS civil liability regime This hugely important book examines the structure of such a regime in unprecedented depth and proposes a uniform governance structure composed of an institutional framework and a legal system for GNSS with safety of life signals at its core Exploring whether the current international law including air law and space law conventions is adequate to deal with the issue of civil liability in the context of GNSS the author confronts and responds to such crucial issues as the following ensuring that parties suffering damage caused by GNSS get fair prompt and adequate compensation balancing the interests of the GNSS industry in order for it to maintain its sustainable development identifying legal gaps arising in the GNSS context and how we should move forward determining which parts of the value chain of GNSS may qualify as origins of damage and construing GNSS civil liability mainly from contractual product and general tort liability perspectives The author assesses various solutions for GNSS civil liability based on their feasibility including an institutional defence against the doctrine of sovereign immunity and recommendations on how several international organisations can work together in this endeavour He examines scholarships travaux pr paratoires conference documents and treaties as well as national legislation A hypothetical case where damage is caused by GNSS is elaborated illustrating each legal relationship and causal link In its committed urging of GNSS signal providers to improve the stability of the satellite navigation systems and its insightful recommendations on how to promote public safety this book offers a roadmap indicating a truly viable international regime of GNSS civil liability Relevant international organisations and States as well as practitioners are sure to respond positively to its unique and important analysis
