Society - Water - Technology Reinhard F. Hüttl, Oliver Bens, Christine Bismuth, Sebastian Hoechstetter, 2015-11-02 This book presents the results of the Interdisciplinary Research Group Society Water Technology of the Berlin Brandenburg Academy of Sciences and Humanities. It describes interdisciplinary evaluation criteria for major water engineering projects MWEPS and portrays an application to the Lower Jordan Valley Middle East and the Fergana Valley Central Asia. Both areas are characterised by transboundary conflicts by challenges due to demographic and climate change and by political and societal pressures. Based on the findings the book provides recommendations for science and political decisions makers as well as for international financing institutions. In addition it outlines research gaps from an interdisciplinary perspective. In the past MWEPS have been used as an instrument to cope with the demands of growing populations and to enhance development progress. Experiences with MWEPS have shown that a purely technical approach has not always brought about the desired results. In many cases MWEPS have even resulted in negative implications for society and environment. Therefore improved management strategies and enhanced technologies for a sustainable water resource management system are a prerequisite to meet present and future challenges. And moreover the continuous evaluation and optimisation of these measures is likewise a must.

Fresh Water in International Law Laurence Boisson de Chazournes, 2013-09-19 Fresh water is an environmental economic social and cultural commodity. This book provides a thorough assessment of its protection management and uses in international law. It explores the international regional and national regulatory frameworks that make up the international legal regime regulating fresh water.

Afro-Eurasia: Assessing Sustainability Ray C. Anderson, Louis Kotzé, Stephen Morse, 2012-10-31 Afro Eurasia Assessing Sustainability focuses on the geographic area where humans originated and first began to make use of the natural world. Earth's largest landmass stretching from Portugal in the west across the steppes of Russia and south across Africa to the Cape of Good Hope. By examining the history of human expansion as well as 21st century pressures to address ecosystem damage across the region international scholars and regional experts weave sustainability into core curricular subjects. The interdisciplinary coverage includes national and regional environmental histories as well as business and commerce migration educational institutions law and government and the lifestyles of diverse populations.

Adaptation to Climate Change through Water Resources Management Dominic Stcker, Elena Lopez-Gunn, 2014-08-27 The impacts of human induced climate change are largely mediated by water such as alterations in precipitation and glacial melt patterns variations in river flow increased occurrence of droughts and floods and sea level rise in densely populated coastal areas. Such phenomena impact both urban and rural communities in developed emerging and developing countries. Taking a systems approach this book analyzes evidence from 26 countries and identifies common barriers and bridges for local adaptation to climate change through water resources management. It includes a global set of case studies from places experiencing increased environmental and social pressure due to population

growth development and migration including in Africa Asia Australia Europe North and South America All chapters consider the crosscutting themes of adaptive capacity equity and sustainability These point to resilient water allocation policies and practices that are capable of protecting social and environmental interests whilst ensuring the efficient use of an often scarce resource

Desert in the Promised Land Yael Zerubavel,2023-05-25 A complex and fascinating portrait of Israel an engaging book that combines anthropology culture and history Anita Shapira author of Ben Gurion Father of Modern Israel At once an ecological phenomenon and a cultural construction the desert has varied associations within Zionist and Israeli culture In the Judaic textual tradition it evokes exile and punishment yet is also a site for origin myths the divine presence and sanctity Secular Zionism developed its own spin on the duality of the desert as the romantic site of Jews biblical roots that inspired the Hebrew culture and as the barren land outside the Jewish settlements in Palestine featuring them as an oasis of order and technological progress within a symbolic desert Yael Zerubavel tells the story of the desert from the early twentieth century to the present shedding light on romantic mythical associations settlement and security concerns environmental sympathies and the commodifying tourist gaze Drawing on literary narratives educational texts newspaper articles tourist materials films popular songs posters photographs and cartoons Zerubavel reveals the complexities and contradictions that mark Israeli society s semiotics of space in relation to the Middle East and the central role of the besieged island trope in Israeli culture and politics

Berkeley Journal of Middle Eastern & Islamic Law ,2012 *International Conflict over Water Resources in Himalayan Asia* R. Wirsing,C. Jasparro,D. Stoll,2012-11-16 The authors explore the fresh water crisis of Himalayan Asia While the region hosts some of the world s mightiest rivers it is also home to rapidly modernizing increasingly affluent and demographically multiplying societies ensuring the rapid depletion of water resources and of disputes over ownership of transboundary waters

Overpopulated Philippines Armando Ang,2009 The Philippines is under assault not from outside source but from within Many are aware of the problem but can do little about it Even if they wanted to do something about it it is aggravated but those who do not think it is a problem The assault is coming from our runaway population explosion There is more than just the vast number of people in the issue of overpopulation Many pro lifers in the country do not seems to grasp the issue of overpopulation in relation to factors such as the quality of life nutritious food education pollution deforestation population density traffic problem crimes unemployment and poverty health etc Most of them are blind to the suffering of the poor who takes the blunt of the problem because they probably never experienced their kind of hardship and quality of life Increasing population naturally entails the need for more of almost everything just to maintain our lifestyle albeit in many low quality for most of the people surviving now We need more classrooms and teachers for the children and we cannot seem to lick both problems after all these decades because of the exploding population growth In a stabilized population there will no longer be need for new classrooms and funds could be channel to improving the education system and getting more children to finish higher education The basic services such as

water supply and health services have been inadequate and will continue to plague us in the coming decades There is not enough clean water to supply even all the inhabitants of the metropolis Many have to pump up their water need from deep wells that are often contaminated while causing the sinking of the land above in many areas Public health clinics and hospitals are often crowded with patients and many are dying for lack of medicines The shelves in the supermarket may be full but most of the poor do not have the money to buy their basic needs According to one latest survey nine millions people are surviving below 1 a day Even more numbers are surviving below 2 a day Not only that they are not getting adequately the basic food necessities such as protein that would allow them to compete in this world Protein is essential for children if they want to develop their brains and improve their IQ Are we going to continue to export our workers like slaves to other countries Many of our countrymen are working abroad to earn a decent life for their family back home Most of these jobs are unwanted by the locals Some of them could be demeaning and often hard works There is a serious unemployment and underemployment problems in the country forcing them to look for jobs elsewhere There is a need to balance the available jobs against the number of young people joining the workforce every year Too many people out of work could mean more crimes as they tried to feed themselves and their families The excessive labor force allows employers to mistreat employees on a hire fire hire basis Many workers have been hired on a contractual work even for simple jobs The female workers are particularly at a disadvantage Some have been forced to work on a commission basis selling cigarettes and candies whose commissions do not add up to half the basic salary mandated by law while others are not even given any commission unless they reach a certain quota This wanton practice is possible only because there are too many unemployed workers in a finite labor market In fact many of them are willing to work for pittance just to fill their stomachs and that of their loved ones

Ethnic Conflict Neal G. Jesse,Kristen P. Williams,2011 Politics **The Jordan River and Dead Sea Basin** Clive Lipchin,Deborah Sandler,Emily Cushman,2009-10-09 The 21st century will present unprecedented challenges Already in its first decade we have seen the dramatic impact of two systemic risks that of climate change and that of the financial crisis The cause but also the solution to these crises lies in a deeper understanding of the underlying factors and int dependencies New ways must be found to overcome deep obstacles and find common solutions to seemingly intractable problems The water crisis in the Middle East is a central challenge of the 21st century The future of the people of the region depends on finding lasting solutions Due to the exhaustion and pollution of available sources compounded by climate change demographic change and economic development the pressures of water resource management will grow New solutions must urgently be found as business as usual is not sustainable This book provides vital new insights into possible elements of a sustainable future in one key area that of the Jordan River and Dead Sea Basin The future development of the Jordanian Palestinian and Israeli people depends on finding a just and sustainable system of water resource management in this Basin Given the potential for regional and other conflicts arising out of tensions over water the ramifications are wider and even global in

significance This volume provides fresh regional and international perspectives which greatly assist in our understanding of the issues and their possible resolution *Encyclopedia of Women & Islamic Cultures* Suad Joseph,Afsaneh Najmabadi,2003 Focuses on women and the civilizations and societies in which Islam has played a historic role Surveys all facets of life society economy politics religion the arts popular culture sports health science medicine environment and so forth of women in these societies *Israel Journal of Earth Sciences* ,2006 **La cuenca del río Bravo y el cambio climático** Polioptron Martínez,2018 **Hydropolitical Vulnerability and Resilience Along International Waters** ,2009 Water scarcity heightens the potential for conflicts among riparian countries in Asia and increases their vulnerability A regional water resource cooperation mechanism would enhance collaboration and increase resilience so that water becomes an instrument for cooperation and unity rather than conflict This publication provides an insightful assessment of the hydropolitical atmosphere in Asia and offers lessons to enhance future cooperation mechanisms Publisher s description *Living Waters* Barbara Kreiger,1988 *An Analysis of the Dead Sea and the River Jordan* Alexander Marcet,1807 *Common Core Document Forming Part of the Reports of States Parties* ,2012 *Science* John Michels (Journalist),2006 **Dead Sea Mysteries** Amelia Khatri,Al,2025-02-12 Dead Sea Mysteries explores the multifaceted nature of this unique body of water weaving together its historical ecological and therapeutic dimensions The book delves into the Dead Sea s significance in Biblical history highlighting its mentions in the Old Testament and examining how ancient beliefs shaped interactions with the Sea Intriguingly despite its high mineral concentration that makes it difficult for most life forms to survive the Dead Sea has been revered for millennia for its purported healing properties The book also examines the Dead Sea s unusual ecosystem focusing on the halophilic organisms that thrive in its extreme environment and the geological forces that formed it It critically assesses the scientific basis for the Sea s therapeutic claims analyzing studies on skin conditions like psoriasis and eczema By presenting archaeological findings scientific research and historical accounts Dead Sea Mysteries offers a comprehensive understanding of the Dead Sea s enduring relevance The book progresses from biblical context to ecological analysis and finally to therapeutic claims building a holistic view of this fascinating landmark *Konflikty o wodę* Piotr Kowalczak,2007
