*Before the Beginning to Beyond the End* Cliff K.K. Lun, 2022-08-31. Life is full of big questions. Who am I? Why am I here? Where am I going? Where do the universe, earth and humans come from? Do humans have free will? What is the meaning of life and death? Do humans and animals have souls and spirits? Where do good and evil come from? Who is Satan? What was his original offense? Why does the devil tempt humans? Why is there pain and suffering? Can the nefarious attitudes in human spirits change for the better? *Before the Beginning to Beyond the End* clearly presents answers to the above questions based in Scripture. The book seeks to unpack the creation of the world and its implications for mankind through the lens of the Bible. Furthermore, it expounds on the cause for human's fall, God's redemption plan, Jesus's fulfillment of Messianic prophecies, future events in the world and what will happen to us beyond the end of time.

This system is incredibly complex and yet it is a fundamental part of what makes us who we are. Yet there is far more to human beings than biology. Many academic disciplines study the

human condition and there are many schools of thought within that study We must also appreciate that the study of human nature did not begin in contemporary times History particularly Western Christian history is full of texts that offer detailed explorations of the human condition However no consensus has yet emerged Consensus or not those working towards religious and spiritual formation are tasked with pursuing the transformation of their communities This book is an attempt to provide some of the background to support this ministerial work It seeks not only to offer a fuller understanding of some of the common views of human nature but also insights into how we might utilize this knowledge in our ministries ministries that strive towards the spiritual being and becoming of our world

If Darwin were to examine the evidence today using modern science would his conclusions be the same? Charles Darwin's *On the Origin of Species* published over 150 years ago is considered one of history's most influential books and continues to serve as the foundation of thought for evolutionary biology. Since Darwin's time, however, new fields of science have emerged that simply give us better answers to the question of origins. With a Ph.D. in cell and developmental biology from Harvard University, Dr. Nathaniel Jeanson is uniquely qualified to investigate what genetics reveal about origins. The Origins Puzzle Comes Together. If the science surrounding origins were a puzzle, Darwin would have had fewer than 15% of the pieces to work with when he developed his theory of evolution. We now have a much greater percentage of the pieces because of modern scientific research. As Dr. Jeanson puts the new pieces together, a whole new picture emerges, giving us a testable predictive model to explain the origin of species. A New Scientific Revolution Begins. Darwin's theory of evolution may be one of science's sacred cows, but genetics research is proving it wrong. Changing an entrenched narrative, even if it's wrong, is no easy task. *Replacing Darwin* asks you to consider the possibility that, based on genetics research, our origins are more easily understood in the context of In the beginning, God, with the timeline found in the biblical narrative of Genesis. There is a better answer to the origins debate than what we have been led to believe. Let the revolution begin. About the Author: Dr. Nathaniel Jeanson is a scientist and a scholar trained in one of the most prestigious universities in the world. He earned his B.S. in Molecular Biology and Bioinformatics from the University of Wisconsin Parkside and his Ph.D. in Cell and Developmental Biology from Harvard University. As an undergraduate, he researched the molecular control of photosynthesis, and his graduate work involved investigating the molecular and

physiological control of adult blood stem cells His findings have been presented at regional and national conferences and have been published in peer reviewed journals such as Blood Nature and Cell Since 2009 he has been actively researching the origin of species both at the Institute for Creation Research and at Answers in Genesis
