Techno-Orientalism 2.0 David S. Roh, Betsy Huang, Greta Aiyou Niu, Christopher T. Fan, Greta A. Niu, 2025-07-15 Building on the groundbreaking Techno Orientalism Imagining Asia in Speculative Fiction History and Media published by Rutgers University Press in 2015 Techno Orientalism 2.0 New Intersections and Interventions addresses the impact of a volatile post pandemic present on speculative futures by and about Asians. The backdrop of this highly anticipated follow up is a world that is radically different than in 2015 COVID 19 threats of a new cold war with China Russia's invasion of Ukraine and the reemergence of strong man politics around the world. An essential volume for this new critical juncture in Asian American history. Techno Orientalism 2.0 catalogs intersectional dialogue with discourses such as Afrofuturism, Indigenous futurities, environmentalism and disability studies. It also engages with recent high profile and lesser known works of Asian and Asian American speculative fiction, film, television, anime, art, music, journalism, architecture, state sponsored policies and infrastructural projects and the now dominant China Panic.

Creative Destruction John T. Dalton, Andrew J. Logan, 2024-06-19 What is creative destruction? Creative destruction, what the economist Joseph Schumpeter called the essential fact about capitalism, describes change or disruption in the economy caused by innovations that replace traditional technologies and practices. Creative destruction is a force so powerful that it has not only shaped economies but also politics, culture, and social relations. In clear and accessible prose, Dalton and Logan illustrate the nature and varieties of creative destruction, how it is central to innovation and entrepreneurship, and why it is important for economic growth. With in-depth case studies of how Netflix challenged and displaced Blockbuster and how Uber and other ride sharing companies are disrupting traditional taxi services, this book examines how economies, societies, and cultures change due to the innovation and experimentation that is central to the prosperity of free societies.

The AI Con Emily M. Bender, Alex Hanna, 2025-05-22 The blizzard of excitement misinformation and pure hype around AI has driven many of us to want an honest guide. If like me you're one of those many you need to read this book. BRIAN ENO Is AI going to take over the world? Have scientists created an artificial lifeform that can think on its own? Is it going to replace all our jobs? Are we about to enter an age where computers are better than humans at everything? The answers to these questions as the expert authors of *The AI Con* make clear are no they wish LOL and definitely not. In fact these fears are all symptoms of the hype being used by tech corporations to justify data theft, motivate surveillance capitalism and devalue human creativity. Packed with real world examples, pithy arguments and expert insights, *The AI Con* arms you to spot AI hype in all its guises, expose the exploitation and power grabs it aims to hide and push back against it at work and in your daily life. A book to inoculate your mind against Big Tech's AI utopian hype.

Yanis Varoufakis, Hanna and Bender provide the clearest picture yet of what AI is, what it is not and why none of us need to accept it. Timnit Gebru A powerful antidote. The authors show that these technologies will serve to deepen existing inequalities and further entrench life and work for the vast majority of people.

The Human Use of Human Beings Norbert Wiener, 2025-08-12 For the 75th anniversary a new edition of *The Human Use of Human Beings* the landmark book that delves into the relationship between humans and computers and presciently anticipates many contemporary dilemmas surrounding AI technology.

With a new introduction by Brian Christian author of the bestselling *Algorithms to Live By* and *The Alignment Problem*. In 1950

mathematician philosopher Norbert Wiener ended this classic book on the place of machines in society with a warning: We shall never receive the right answers to our questions unless we ask the right questions.

The hour is very late and the choice of good and evil knocks at our door.

Wiener the founder of the science of cybernetics the study of the relationship between computers and the human nervous system was widely mislabeled as an advocate for the automation of human life.

As *The Human Use for Human Beings* reveals his vision was much more complex and interesting and is more relevant in today's world of AI than anyone could have anticipated.

In his new introduction Brian Christian aptly calls Wiener the progenitor of contemporary AI safety discourse. Wiener hoped that machines would release people from relentless and repetitive drudgery to achieve more creative pursuits yet he anticipated the danger of dehumanizing and displacement. His pioneering views on the human machine relationship as a communicative process are only more crucial now as we carry in our pockets AI devices.
