Accessible Design Review Guide Robert R. Grist, 1996 A new and innovative approach to both designing and analyzing proposed and existing facilities for ADAAG compliance. With its emphasis on physical accessibility the Americans with Disabilities Act Accessibility Guidelines ADAAG have far reaching implications for the design or renovation of virtually all public use buildings and sites in the United States. Yet there has been little guidance on how to design and review the drawings and specifications of an existing or proposed facility to assess its ADAAG compliance. This invaluable reference provides such guidance at last for architects interior designers landscape architects engineers builders planners facilities managers specification writers construction code officials teachers and students as well as individuals concerned with access issues. The authors present the ADAAG in an easily understandable format grouping ADAAG criteria into detailed checklists for specific interior and exterior spaces such as offices classrooms retail shops restaurants restrooms and parking garages. This sensible approach makes the review process of any room building or site highly manageable. For additional convenience the presentation parallels the design process from schematic design through construction documents including detail schedule and specification review. Complete with review forms checklists graphics and other information necessary to ensure ADAAG compliance this thorough guide will prove invaluable to everyone involved with the design or retrofit of accessible buildings and sites   *Hospital Attendant* Arco Publishing Company, 1967   **Monthly Catalog of United States**
